RESEARCH
ASSOCIATES

The DRA PRICE GUIDE is compiled on the basis of market quotations, wholesale and retail, local and national sales staff judgment. Consideration is given to the cost of reconditioning and refinishing equipment in the price differentials between AS IS and RECONDITIONED FOR RESALE. Prices on equipment sold at auction are included in our computation of AS IS price listings.

In some cases due to the small amount of activity, certain pieces of equipment have been left off the listing. If the market appears to be more active at a future time this equipment will be returned to the listing.

Our research indicates that approximately 2% of dollar sales is reflected in games over 6 years old. Therefore, as a practical measure, and to make the PRICE GUIDE easier to use, we have eliminated almost all games manufactured prior to 1979. In a few unusual cases where an item is still in demand, we have retained it in our listing. Phonographs go back as far as 1972 and vending to 1975.

While we believe the prices are a fair and reasonable reflection of the market at the time of publishing, DISTRIBUTORS RESEARCH ASSOCIATES cannot assume any responsibility whatsoever as to the listing being correct in any given area.

The DRA is published as a broad guide line only and should be considered as such.

ABOUT REPLACEMENT KITS

Many of you are buying kits for games whose income has dropped. That's as it should be. But buy kits for the right reasons, not just because they're cheaper than dedicated games.

Kits have a place in the industry and we have listed most of the better ones on the facing page. But — and this is a big BUT — they are not a substitute for a brand new sparkling game that has proven to be a winner.

Another thing; improperly installed, kits can be troublesome. So buy them from your local distributor who can help you with any problems you may encounter.
