powered by Mac OS X

You will need the following items to view this page in its entirety.

All Platforms Windows Macintosh
BEFORE USING THE PRODUCT, BE SURE TO READ THE FOLLOWING:

To maintain the safety:

To ensure the safe usage of the product, be sure to read the following before using the product. The following instructions are intended for the users, operators and the personnel in charge of the operation of the product. After carefully reading and sufficiently understanding the warning displays and cautions, handle the product appropriately. Be sure to keep this manual nearby the product or elsewhere convenient for referring to it when necessary.

Herein, explanations which require special attention are enclosed with dual lines. Depending on the potentially hazardous degrees, the terms of WARNING, CAUTION, etc. are used. Be sure to understand the contents of the displays before reading the text.

Indicates that mishandling the product by disregarding this warning will cause a potentially hazardous situation which can result in death or serious injury.

Indicates that mishandling the product by disregarding this caution will cause a slight hazardous situation which can result in personal injury and or material damage.

For the safe usage of the product, the following pictographs are used:

Indicates “HANDLE WITH CARE.” In order to protect the human body and equipment, this display is attached to places where the Owner’s Manual and or Service Manual should be referred to.

- **Perform work in accordance with the instructions herein stated.**
  Instructions for work are explained by paying attention to the aspect of accident prevention. Failing to perform work as per the instructions can cause accidents. In the case where only those who have technical expertise should perform the work to avoid hazardous situation, the instructions herein state that the serviceman should perform such work.

- **Be sure to turn off power before working on the machine.**
  To prevent electric shock, be sure to turn off power before starting the work in which the worker touches the interior of the product. If the work is to be performed in the power-on status, the Instruction Manual herein always states to that effect.

- **Be sure to ground the Earth Terminal** (this, however, is not required in the case where a power cord with earth is used).
  This product is equipped with the Earth Terminal. When installing the product, Connect the Earth Terminal to the “accurately grounded indoor earth terminal” by using an earth wire. Unless the product is grounded appropriately, the user can be subject to electric shock. After performing repair, etc. for the Control equipment, ensure that the Earth Wire is firmly connected to the Control equipment.

- **Ensure that the Power Supply used is equipped with an Earth Leakage Breaker.**
  This product does not incorporate the Earth Leakage Breaker. Using a power supply which is not equipped with the Earth Leakage Breaker can cause a fire when earth leakage occurs.

- **Be sure to use fuses which meet the specified rating.** (only for the machines which use fuses).
  Using fuses exceeding the specified rating can cause a fire and electric shock.
○ Specification changes (removal of equipment, conversion and addition) not designated by SEGA are not allowed.
The parts of the product include warning labels for safety, covers for personal protection, etc. It is very hazardous to operate the product by removing parts and or modifying the circuits. Should doors, lids and protective parts be damaged or lost, refrain from operating the product, and contact where the product was purchased from or the office herein stated. SEGA shall not be held responsible for any accidents, compensation for damage to a third party, resulting from the specifications not designated by SEGA.

○ Ensure that the product meets the requirements of appropriate Electrical Specifications.
Before installing the product, check for Electrical Specifications. SEGA products have a nameplate on which Electrical Specifications are described. Ensure that the product is compatible with the power supply voltage and frequency requirements of the location. Using any Electrical Specifications different from the designated Specifications can cause a fire and electric shock.

○ Install and operate the product in places where appropriate lighting is available, allowing warning labels to be clearly read.
To ensure safety for the customers, labels and printed instructions describing potentially hazardous situation are applied to places where accidents can be caused. Ensure that where the product is operated has sufficient lighting allowing the warnings to be read. If any label is peeled off, apply it again immediately. Please place an order with where the product was purchased from or the office herein stated.

○ When handling the Monitor, be very careful. (Applies only to the product w/monitor.)
Some of the monitor (TV) parts are subject to high tension voltage. Even after running off power, some portions are still subject to high tension voltage sometimes. Monitor repair and replacement should be performed only by those technical personnel who have knowledge of electricity and technical expertise.

○ Be sure to adjust the monitor (projector) properly. (Applies only to the product w/monitor.)
Do not operate the product leaving on-screen flickering or blurring as it is. Using the product with the monitor not properly adjusted may cause dizziness or a headache to an operator, a player, or the customers.

○ When transporting or reselling this product, be sure to attach this manual to the product.
In the case where commercially available monitors and printers are used in this product, only the contents relating to this product are explained herein. Some commercially available equipment has functions and reactions not stated in this manual. Read this manual together with the specific Instruction Manual of such equipment.

• Descriptions herein contained may be subject to improvement changes without notice.
• The contents described herein are fully prepared with due care. However, should any question arise or errors be found, please contact SEGA.

**INSPECTIONS IMMEDIATELY AFTER TRANSPORTING THE PRODUCT TO THE LOCATION.**

Normally, at the time of shipment, SEGA products are in a status allowing for usage immediately after transporting to the location. Nevertheless, an irregular situation may occur during transportation. Before turning on power, check the following points to ensure that the product has been transported in a satisfactory status.

☐ Are there any dented portions or defects (cuts, etc.) on the external surfaces of the cabinet?
☐ Are Casters and Adjusters, damaged?
☐ Do the power supply voltage and frequency requirements meet with those of the location?
☐ Are all wiring connectors correctly and securely connected? Unless connected in the correct direction, connector connections cannot be made accurately. Do not insert connectors forcibly.
☐ Do power cords have cuts and dents?
☐ Do the fuses used meet specified rating? Is the Circuit Protector in an energized status?
☐ Are all accessories available?
☐ Can all Doors and Lids be opened with the Accessory keys? Can Doors and Lids be firmly closed?
### BEFORE USING THE PRODUCT, BE SURE TO READ THE FOLLOWING:

INTRODUCTION OF THE OWNERS MANUAL

This Owner's Manual is intended to provide detailed descriptions together with all the necessary information covering the general operation of electronic assemblies, electromechanicals, servicing control, spare parts, etc. as regards the product, **SEGA INITIAL “D” VER.2 DELUXE.**

This manual is intended for the owners, personnel and managers in charge of operation of the product. Operate the product after carefully reading and sufficiently understanding the instructions. If the product fails to function satisfactorily, non-technical personnel should under no circumstances touch the internal system. Please contact where the product was purchased from.

Use of this product is unlikely to cause physical injuries or damages to property. However, where special attention is required this is indicated by a thick line, the word "IMPORTANT" and its sign in this manual.

**STOP**

Indicates that mishandling the product by disregarding this display can cause the product's intrinsic performance not to be obtained, resulting in malfunctioning.

**IMPORTANT!**

SEGA AMUSEMENTS USA, INC./CUSTOMER SERVICE
45133 Industrial Drive, Fremont, California 94538, U.S.A.
Phone : (415) 701-6580
Fax : (415) 701-6594
DEFINITION OF LOCATION MAINTENANCE MAN AND SERVICEMAN

Non-technical personnel who do not have technical knowledge and expertise should refrain from performing such work that this manual requires the location's maintenance man or a serviceman to carry out, or work which is not explained in this manual. Failing to comply with this instruction can cause a severe accident such as electric shock.

Ensure that parts replacement, servicing & inspections, and troubleshooting are performed by the location's maintenance man or the serviceman. It is instructed herein that particularly hazardous work should be performed by the serviceman who has technical expertise and knowledge.

The location's maintenance man and serviceman are herein defined as follows:

"Location's Maintenance Man" :
Those who have experience in the maintenance of amusement equipment and vending machines, etc., and also participate in the servicing and control of the equipment through such routine work as equipment assembly and installation, servicing and inspections, replacement of units and consumables, etc. within the Amusement Facilities and or locations under the management of the Owner and Owner's Operators of the product.

Activities of Location's Maintenance Man :
Assembly & installation, servicing & inspections, and replacement of units & consumables as regards amusement equipment, vending machines, etc.

Serviceman :
Those who participate in the designing, manufacturing, inspections and maintenance service of the equipment at an amusement equipment manufacturer. Those who have technical expertise equivalent to that of technical high school graduates as regards electricity, electronics and or mechanical engineering, and daily take part in the servicing & control and repair of amusement equipment.

Serviceman's Activities :
Assembly & installation and repair & adjustments of electrical, electronic and mechanical parts of amusement equipment and vending machines.
Notes:
1. HANDLING PRECAUTIONS

When installing or inspecting the machine, be very careful of the following points and pay attention to ensure that the player can enjoy the game safely. Non-compliance with the following points or inappropriate handling running counter to the cautionary matters herein stated can cause personal injury or damage to the machine.

- Before performing work, be sure to turn power off. Performing the work without turning power off can cause an electric shock or short circuit. In the case work should be performed in the status of power on, this manual always states to that effect.
- To avoid electric shock or short circuit, do not plug in or unplug quickly.
- To avoid electric shock, do not plug in or unplug with a wet hand.
- Do not expose Power Cords and Earth Wires on the surface, (floor, passage, etc.). If exposed, the Power Cords and Earth Wires are susceptible to damage. Damaged cords and wires can cause electric shock or short circuit.
- To avoid causing a fire or electric shock, do not put things on or damage Power Cords.
- When or after installing the product, do not unnecessarily pull the power cord. If damaged, the power cord can cause a fire or electric shock.
- In case the power cord is damaged, ask for replacement through where the product was purchased from or the office herein stated. Using the cord as is damaged can cause fire, electric shock or leakage.
- Be sure to perform grounding appropriately. Inappropriate grounding can cause an electric shock.
- Be sure to use fuses meeting specified rating. Using fuses exceeding the specified rating can cause a fire or electric shock.
- Completely make connector connections for IC BD and others. Insufficient insertion can cause an electric shock.
- Specification changes, removal of equipment, conversion and/or addition, not designated by SEGA are not permitted.
  - Failure to observe this may cause a fire or an electric shock. Non-compliance with this instruction can have a bad influence upon physical conditions of the players or the lookers-on, or result in injury during play.
  - SEGA shall not be held responsible for damage, compensation for damage to a third party, caused by specification changes not designated by SEGA.
- Be sure to perform periodic maintenance inspections herein stated.
For the IC board circuit inspections, only the logic tester is allowed. The use of a multiple-purpose tester is not permitted, so be careful in this regard.

Static electricity from your body may damage some electronics devices on the IC board. Before handling the IC board, touch a grounded metallic surface so that the static electricity can be discharged.

Some parts are the ones designed and manufactured not specifically for this game machine. The manufacturers may discontinue, or change the specifications of, such general-purpose parts. If this is the case, Sega cannot repair or replace a failed game machine whether or not a warranty period has expired.

◆ PRODUCTION DATE ◆

This SEGA product was produced in the month and year of:

May/2003

This signifies that this work was disclosed in 2003.
2. PRECAUTIONS CONCERNING INSTALLATION LOCATION

WARNING:
This product is an indoor game machine. Do not install it outside. Even indoors, avoid installing in places mentioned below so as not to cause a fire, electric shock, injury and or malfunctioning.

- Places subject to rain or water leakage, or places subject to high humidity in the proximity of an indoor swimming pool and or shower, etc.
- Places subject to direct sunlight, or places subject to high temperatures in the proximity of heating units, etc.
- Places filled with inflammable gas or vicinity of highly inflammable/volatile chemicals or hazardous matter.
- Dusty places.
- Sloped surfaces.
- Places subject to any type of violent impact.
- Vicinity of anti-disaster facilities such as fire exits and fire extinguishers.
- The operating (ambient) temperature range is from 5°C to 30°C.

LIMITATIONS OF USAGE REQUIREMENTS

- Be sure to check the Electrical Specifications. Ensure that this product is compatible with the location's power supply, voltage and frequency requirements. A plate describing Electrical Specifications is attached to the product. Non-compliance with the Electrical Specifications can cause a fire and electric shock.
- This product requires the Breaker and Earth Mechanisms as part of the location facilities. Using them in a manner not independent can cause a fire and electric shock.
- Ensure that the indoor wiring for the power supply is rated at 15 A or higher (AC single phase 100 ~ 120 V area). Non-compliance with the Electrical Specifications can cause a fire and electric shock.
- Be sure to independently use the power supply equipped with the Earth Leakage Breaker. Using a power supply without the Earth Leakage Breaker can cause an outbreak of fire when earth leakage occurs.
- Putting many loads on one electrical outlet can cause generation of heat and a fire resulting from overload.
- When using an extension cord, ensure that the cord is rated at 15 A or higher (AC 100 ~ 120 V area). Using a cord rated lower than the specified rating can cause a fire and electric shock.
For the operation of this machine, secure a minimum area of 44 in. (W) x 76 in. (D). In order to prevent injury resulting from the falling down accident during game play, be sure to secure the minimum area for operation.

- Be sure to provide sufficient space so as to allow this product's ventilation fan to function efficiently. To avoid machine malfunctioning and a fire, do not place any obstacles near the ventilation opening.

- SEGA shall not be held responsible for damage, compensation for damage to a third party, resulting from the failure to observe this instruction.

For transporting the machine into the location's building, the minimum necessary dimensions of the opening (of doors, etc.) are 38 in. (W) and 66 in. (H).

- Electric current consumption
  - MAX. 10 A (AC 120 V 60 Hz)

![Operation Area](FIG. 2)
3. OPERATION

PRECAUTIONS TO BE HEEDED BEFORE STARTING THE OPERATION

To avoid injury and trouble, be sure to constantly give careful attention to the behavior and manner of the visitors and players.

In order to avoid accidents, check the following before starting the operation:

- To ensure maximum safety for the players and the customers, ensure that where the product is operated has sufficient lighting to allow any warnings to be read. Operation under insufficient lighting can cause bodily contact with each other, hitting accident, and or trouble between customers.
- Be sure to perform appropriate adjustment of the monitor (projector). For operation of this machine, do not leave monitor's flickering or deviation as is. Failure to observe this can have a bad influence upon the players' or the customers' physical conditions.
- It is suggested to ensure a space allowing the players who feel sick while playing the game to take a rest.
- Check if all of the adjusters are in contact with the surface. If they are not, the Cabinet can move and cause an accident.

Ensure that all of the Adjusters are in contact with the floor.
**WARNING!**

- Do not put any heavy item on this product. Placing any heavy item on the product can cause a falling down accident or parts damage.
- Do not climb on the product. Climbing on the product can cause falling down accidents. To check the top portion of the product, use a step.
- To avoid electric shock, check to see if door & cover parts are damaged or omitted.
- To avoid electric shock, short circuit and or parts damage, do not put the following items on or in the periphery of the product. Flower vases, flowerpots, cups, water tanks, cosmetics, and receptacles/containers/vessels containing chemicals and water.

**CAUTION!**

To avoid injury, be sure to provide sufficient space by considering the potentially crowded situation at the installation location. Insufficient installation space can cause making bodily contact with each other, hitting accidents, and or trouble between customers.

**PRECAUTIONS TO BE HEENDED DURING OPERATION (PAYING ATTENTION TO CUSTOMERS)**

To avoid injury and trouble, be sure to constantly give careful attention to the behavior and manner of the visitors and players.

**WARNING!**

- To avoid injury and accidents, those who fall under the following categories are not allowed to play the game.
  - Those who need assistance such as the use of an apparatus when walking.
  - Those who have high blood pressure or a heart problem.
  - Those who have experienced muscle convulsion or loss of consciousness when playing video game, etc.
  - Those who have a trouble in the neck and or spinal cord.
  - Intoxicated persons.
  - Pregnant women or those who are in the likelihood of pregnancy.
  - Persons susceptible to motion sickness.
  - Persons whose act runs counter to the product's warning displays.
- A player who has never been adversely affected by light stimulus might experience dizziness or headache depending on his physical condition when playing the game. Especially, small children can be subject to those conditions. Caution guardians of small children to keep watch on their children during play.
- Instruct those who feel sick during play to have a medical examination.
- To avoid injury resulting from falling down and electric shock due to spilled drinks, instruct the player not to place heavy items or drinks on the product.
- To avoid electric shock and short circuit, do not allow customers to put hands and fingers or extraneous matter in the openings of the product or small openings in or around the doors.
- To avoid falling down and injury resulting from falling down, immediately stop the customer's leaning against or climbing on the product, etc.
• To avoid electric shock and short circuit, do not allow the customers to unplug the power plug without a justifiable reason.

• This product is intended for 1 Player only per seat. Playing the game by 2 or more Players riding on the seat together can cause falling down and collision accidents by striking head, hand, or elbow.

• Caution lookers-on so as not to touch the operating unit while in play. Failure to observe this may cause bodily contact with the player and trouble between the customers.

• Caution the player so as not to hold a child in her/his lap to play. Failure to observe this may cause the child to be caught between the Control Panel and the player and fall down.

• Immediately stop such violent acts as hitting and kicking the product. Such violent acts can cause parts damage or falling down, resulting in injury due to fragments and falling down.

• Instruct the Player to adjust the seat before playing the game. Playing the game in a forcible posture can cause a contingent accident.
When an unjust act is performed, no written data is backed up mechanically. The following acts may be judged to be unjust acts. Since it also becomes a defect of operation and the cause of parts damage, caution the player not to perform the following acts.

- Use of cards bent or deformed
- Use of cards adhered seals or extraneous matter on
- Use of a card mixed two sheets
- Use of cards other than dedicated cards
- When a card is extracted quickly

If the card reader/writer has not been set as being unused, you will be unable to select any game mode with use of cards while the game will be in progress. Thus, for the card reader/writer, deal with the player, paying attention to the following points:

Even if the player requests the system for use of cards when you have set the machine so that the card reader/writer is not used, the request is rejected.

**WARNING: HAZARD TO EPILEPTICS.**

- A very small portion of the population has a condition which may cause them to experience epileptic seizures or have momentary loss of consciousness when viewing certain kinds of flashing lights or patterns that are present in our daily environment. These persons may experience seizures while watching some kinds of television pictures or playing certain video games. People who have not had any previous seizures may nonetheless have an undetected epileptic condition.
- If you or anyone in your family has experienced symptoms linked to an epileptic condition (e.g., seizures or loss of awareness), immediately consult your physician before using any video games.
- We recommend that parents observe their children while they play video games. If you or your child experience the following symptoms: dizziness, altered vision, eye or muscle twitching, involuntary movements, loss of awareness, disorientation, or convulsions, DISCONTINUE USE IMMEDIATELY and consult your physician.

When transporting the machine, make sure that the following parts are supplied. Magnetic cards for the recording of play results, and cleaning kits for cleaning the head of the card reader/writer are sold separately. Subsequent purchases of these items can be made by contacting the office listed on this Owner's Manual or the dealer from whom the product was originally purchased. Be sure to provide the part number(s), name(s), and required number of items.

HOW TO USE THE CARTON BOX (GD-ROM DRIVE)

STOP

IMPORTANT!

When you want to order for replacing or repairing service of the GD-ROM drive that is used by the product, pack it in a carton box as instructed below, and then deliver the carton box to a service agent. If you do not observe the instruction, your order may not be accepted or may be charged additionally. If you handle the GD-ROM drive differently from the following instructions, its components may be damaged.

- Contain the GD-ROM drive in a dedicated carton box. Do not disassemble it or remove any part from it unless otherwise instructed.
- Before containing the GD-ROM drive in a dedicated carton box, attach the GD-ROM drive lid (DISC LID) onto the drive and fix the lid with a screw.
- Before containing the GD-ROM drive in a dedicated carton box, remove the GD-ROM disk from the drive. Do not attempt to move the GD-ROM drive with a GD-ROM disk inside.
- Before containing the GD-ROM drive in a dedicated carton box, remove the GD-ROM drive bracket. Carefully keep the GD-ROM drive bracket and the 4 set screws, because they will be reused.
- When inserting the GD-ROM drive into a dedicated carton box, be careful about an inserting direction as illustrated below.
- The packing materials in a carton box are used as a cushion. Use them always when inserting the GD-ROM drive into a dedicated carton box. Do not bend them.

FIG. 5 b
6. ASSEMBLING AND INSTALLATION

- Perform assembly work by following the procedure herein stated. Failing to comply with the instructions can cause electric shock hazard.
- Perform assembling as per this manual. Since this is a complex machine, erroneous assembling can cause an electric shock, machine damage and or not functioning as per specified performance.
- When assembling, be sure to use plural persons. Depending on the assembly work, there are some cases in which working by one person alone can cause personal injury or parts damage.
- Ensure that connectors are accurately connected. Incomplete connections can cause electric shock hazard.
- Be careful not to damage the wires. Damaged wires may cause electric shock or short circuit or present a fire risk.
- This work should be performed by the Location's Maintenance Man or Serviceman. Performing work by non-technical personnel can cause a severe accident such as electric shock. Failing to comply with this instruction can cause a severe accident such as electric shock to the player during operation.
- Provide sufficient space so that assembling can be performed. Performing work in places with narrow space or low ceiling may cause an accident and assembly work to be difficult.
- To perform work safely and avoid serious accident such as the cabinet's falling down, do not perform work in places where step-like grade differences, a ditch, or slope exist.

- Handle molded parts with care. Undue weight or pressure may cause them to break and the broken pieces may cause injury.
- To perform work safely and securely, be sure to prepare a step which is in a secure and stable condition. Performing work without using the step can cause violent falling down accidents.
- Make sure that the GD cable connector is inserted parallel to the plug. Improper insertion may cause damage to the connector and present a fire risk.
When carrying out the assembling and installation, follow the following 6-item sequence.

1. SECURING IN PLACE (ADJUSTER ADJUSTMENT)
2. POWER SUPPLY, AND EARTH CONNECTION
3. TURNING POWER ON
4. ASSEMBLING CHECK

Tools such as a Phillips type screwdriver, wrench, socket wrench and Ratchet Handle are required for the assembly work.
SECURING IN PLACE (ADJUSTER ADJUSTMENT)

Make sure that all of the adjusters are in contact with the floor. If they are not, the cabinet can move and cause an accident.

This product has 8 casters and 8 Adjusters. (FIG. 6. 2 a) When the installation position is determined, cause the adjusters to come into contact with the floor directly, make adjustments in a manner so that the casters will be raised approximately 5 mm from the floor and make sure that the machine position is level.

- Transport the product to the installation position.
- Have all of the Adjusters make contact with the floor. Adjust the Adjuster's height by using a wrench so that the machine position is kept level.
- After making adjustment, fasten the Adjuster Nut upward and secure the height of Adjuster.

* Note: Picture may differ from actual unit.
FIG. 6. 2 e
Provide ventilation space for the ventilation opening.
Allow more than 28 in. of space for customer traffic.
Be sure to independently use the power supply socket outlet equipped with an Earth Leakage Breaker. Using a power supply without an Earth Leakage Breaker can cause a fire when electric leakage occurs.

Ensure that the "accurately grounded indoor earth terminal" and the earth wire cable are available (except in the case where a power cord plug with earth is used). Connect the earth terminal and the indoor earth terminal with the prepared cable. If the grounding work is not performed appropriately, customers can be subjected to an electric shock, and the product's functioning may not be stable.

Ensure that the power cord and earth wire are not exposed on the surface (passage, etc.). If exposed, they can be caught and are susceptible to damage. If damaged, the cord and wire can cause electric shock and short circuit accidents. Ensure that the wiring position is not in the customer's passage way or the wiring has protective covering.

After wiring power cord on the floor, be sure to protect the power cord. Exposed power cord is susceptible to damage and causes an electric shock accident.

The AC Unit is located the back of the Cabinet. The AC Unit has Main SW and the Inlet which connects the Power Cord.

Ensure that the Main SW is OFF.

* Note: Actual Power Supply connection may vary from photo
**TURNING POWER ON**

Turn on the AC unit's main switch to supply power to the unit. Once power is turned on, the fluorescent lamp lights up. The Start System Screen displays after a lapse of several seconds. It is followed by the screen that indicates that the network is currently being checked if the communication mode has been set. If there is a bad or improper communication connection, each screen will not proceed to the next, remaining on the currently Network Check Screen. If this occurs, resolve the error according to the instructions in this document.

If the communication mode has not been set or the communication check ends normally, the Motor Check Screen returns. While the Motor Check Screen is on-screen, the steering wheel can move either clockwise or counterclockwise. If you touch the wheel, the motor check is hindered and the game will not operate normally. So, you must not touch it at this time. Failures are displayed, if found. Resolve the errors according to the instructions in this document.

Once all the above steps have been completed, the Advertise Screen displays and voices are output through the left and right loudspeakers, unless you have set the machine so that no voices are output during the Advertise mode.

This product retains the number of credits and the ranking data even after the power is turned off. It does not retain data about the fractional number of coins (i.e., the number of coins not reaching one credit) or the bonus adder count.

*Note: Picture may differ from actual unit.*
Each Check Screen is followed as below.

Network Check Screen

CHECKING NETWORK NOW

Card Reader/Writer Check Screen

CARD R/W INITIALIZE...

- When Card is left in the Card Reader/Writer;
- Remove the card. Screen does not change until the card is removed.

Motor Check Screen

KICKBACK INITIALIZE...

- When cleaning is required;

PLEASE INSERT CLEANING CARD.

- Steering wheel will turn. Do not touch it.

Please insert the cleaning card. (See 7-2 HEAD CLEANING.)
ASSEMBLING CHECK

In the TEST MODE, ascertain that the assembly has been made correctly and IC BD. is satisfactory (refer to Section 10).
In the test mode, perform the following test:

(1) MEMORY TEST

Selecting the RAM TEST on the system test mode menu screen causes the on-board memory to be tested automatically. The game board is satisfactory if the display beside each IC No. shows GOOD.

<table>
<thead>
<tr>
<th>RAM TEST</th>
</tr>

PRESS TEST BUTTON TO EXIT
(2) SOUND TEST

In the system test mode, selecting SOUND TEST causes the screen (on which sound related BD and wiring connections are tested) to be displayed. Check if the sound is satisfactorily emitted from each speaker and the sound volume is appropriate.

SELECT WITH SERVICE BUTTON AND PRESS TEST BUTTON

(3) C.R.T. TEST

In the system test mode menu, selecting C.R.T. TEST allows the screen (on which the monitor is tested) to be displayed. Although the monitor adjustments have been made at the time of shipment from the factory, color deviation, etc., may occur due to the effect caused by geomagnetism, the location building's steel frames and other game machines in the periphery. By watching the system test mode screen, make judgment as to whether an adjustment is needed. If it is necessary, adjust the monitor by referring to Chapter 15.

SYSTEM TEST MODE

* Note: Screen shows a grid.
(4) INPUT TEST

Selecting the INPUT TEST on the game test mode menu screen causes the screen (on which each switch is tested) to be displayed. Press each switch. If the display beside each switch indicates "ON," the switch and wiring connections are satisfactory.

Perform the above inspections also at the time of monthly inspection.
7. CARD READER/WRITER

7-1 SETTING DEDICATED CARDS

- Be sure to use dedicated cards available for this product. Use of ones other than such dedicated cards may cause a malfunction or failure of the machine.
- Be sure to set the specified number of cards in the specified orientation by using the specified procedure. Wrong setting of the cards may cause the machine to fail.
- This machine allows you to set up to 100 cards at a time. You must not set over 101 cards at a time. If you do so, a trouble such as card jamming may occur.
- Set virgin cards taken out from a container that was unpacked immediately before use.
- Use of any deformed or deteriorated card may cause a trouble.
- Do not include a corrugated, bent, or used card in the card deck.

When the unit is out of cards, a message will be displayed at the upper right of the screen during advertisements. Follow the instructions below to restock the system with cards. Cards may be stocked when the unit is on or off.

After restocking the system with cards, the message displayed after the "SEGA" logo will be updated. Gameplay can be resumed without waiting for the updated message.

- Unlock and open the cover to find the card reader/writer.
  The dispenser on which you should place the cards is located at the rear of the reader/writer.

- From the card reader/writer, take out the dispenser upward in a straight line.

* Note: Pictures may differ from actual Unit.
- Remove the cover from the back of the dispenser.

![Images showing steps: Remove the dispenser's cover, place cards in the dispenser, close the cover, reinstall the dispenser.](https://www.seuservice.com)

**FIG. 7. 1 a**

- Place the cards into the dispenser according to the instructions on the sticker annexed to the dispenser. Refer to the diagram shown on the sticker attached to the Dispenser and insert the cards into the Dispenser. Be careful not to insert the cards in the wrong direction or with the wrong side facing up.
  - The Dispenser can only hold 100 cards. Do not attempt to insert more than 100 cards. Too many cards may cause the Dispenser to jam or result in other problems.
  - Insert magnetic cards into the Dispenser in complete packs of 100 or after carefully counting the number of cards (not to exceed 100).

![Diagram showing correct orientation for loading cards.](https://www.seuservice.com)

**FIG. 7. 1 b**

- Reinstall the cover to the dispenser.
- Insert the dispenser into the card reader/writer. The dispenser can be inserted only in the predetermined orientation.
- Close and lock the cover.
7-2 HEAD CLEANING

The unit enters Head Cleaning Mode when any of the following conditions are met:
- At power-up if the Card Reader/Writer has operated 100 times or more
- At power-up if the date has been updated
- At boot time after performing Backup Data Clear

Once the unit enters Head Cleaning Mode, follow the on-screen instructions and perform Head Cleaning. The unit will not exit Cleaning Mode (i.e. games may not be played) until head cleaning is complete.

Always use the designated Cleaning Card. Using anything other than the designated card or carrying out any other procedure other than the one outlined in the manual may cause faulty printing, faulty operation and/or unit failure.

Cleaning Cards may only be used once. Dispose of them after use.

Cleaning Cards should be used immediately after removal from the package. Cleaning Cards will not clean effectively if dried out.

Perform head cleaning only when there are cards in the Card Reader/Writer Dispenser. If the Dispenser is empty, the part that secures the cards inside the Dispenser may touch the rotating part of the Card Reader/Writer and cause noise.

Always remember to remove the Cleaning Card after completing head cleaning.

After head cleaning, wait for the "SEGA LOGO" to be displayed at least twice before resuming gameplay.

This machine records the number of times the Card Reader/Writer is used. The Card Reader/Writer writes data to and reads data from cards. Each write and read is counted, so the Card Reader/Writer usage count will not be the same as the number of times the game is played.

Once head cleaning of the Card Reader/Writer is complete, the unit will exit this mode. Follow the on-screen instructions to carry out cleaning.

PLEASE INSERT CLEANING CARD.

Insert the Cleaning Card into the card slot.

NOW CLEANING...

Indicates that the unit is undergoing cleaning. Wait for cleaning to be completed.

The unit exits to normal mode after cleaning is complete. Do not forget to remove the Cleaning Card. Wait for the "SEGA LOGO" to be displayed at least twice before resuming gameplay after cleaning.

The Card Reader/Writer usage count described above is reset when cleaning is performed.

Manual head cleaning may also be performed from Test Mode. Refer to Test Mode <10-3G> for more details.
When attempting to perform this operation without powering down so that gameplay can be restored, exercise extreme caution. Machine parts may move unexpectedly when the power is ON. This may result in fingers being caught or severed and other injuries. Verify the Stay Lock on the top cover before attempting this procedure. If the top cover closes during the procedure, it may result in serious injury.

If a trouble such as card jamming occurs on the card reader/writer, you are notified of the trouble on the screen. You cannot proceed to a play unless you resolve the trouble at this time. First identify the trouble before you begin to take action.

An error message is displayed at the top of the screen when cards become jammed. Use the RESTORE command (hold down the Start button + Change View button for a long time) to retry the function that caused the error. If repeated attempts continue to generate errors, follow the instructions below to remove the card. Removing the card may force the game to shut down. If the game shuts down, existing customer game data will not be saved.

- Unlock and open the cover.
- Unlock the hatch by drawing the green shaft attached to the top cover on the card reader/writer. While drawing the shaft, open the cover up.
- Remove the card jammed in the card reader/writer.
- While drawing the shaft, close the cover. With the top cover closed, release the green shaft. Check that the top cover has been locked securely.

* Note: Unit may differ from Photo.
8. PRECAUTIONS WHEN MOVING THE MACHINE

- When moving the machine, be sure to unplug the power plug. Moving the machine with the plug as is inserted can damage the power cord and cause fire and electric shock hazards.
- When moving the machine on the floor, retract the Adjusters and ensure that Casters make contact with the floor. During transportation, pay careful attention so that Casters do not tread power cords and earth wires. Damaging the power cords can cause electric shock and short circuit hazards.
- Do not push the cabinet from the left/right when attempting to move the unit. Pushing from the sides may cause the unit to tip and result in injury and damage to parts.

Do not push on any parts made of glass (e.g. Plasma screen) or plastic, as these parts may break and result in bodily injury.

* Note: Pertains when unit is separated.
* Note: Image differs from actual Unit.
In locations with low ceilings, remove the POP and POP Holder before moving the machine.

* Note: Image differs from actual Unit.

FIG. 8 b

Place the machine on casters.
9. GAME DESCRIPTION

The following explanations apply to the case the product is functioning satisfactorily. Should there be any moves different from the following contents, some sort of faults may have occurred. Immediately look into the cause of the fault and eliminate the cause thereof to ensure satisfactory operation.

When in an advertising state, the screen displays the demonstration pictures and ranking data. Sounds are heard from the speakers on the right and left of the monitor. The advertising sounds are not heard if you have set this function to off (disabled).

The start button and the change view button on the control panel are integrated with a lamp. The start button (lamp) flashes when the coins are inserted enough to play the game.

* Note: Unit in Photo may differ from actual Unit.
Game Overview

The game is a car racing game with three different game modes: "Legend of the Streets", "Time Attack" and "The Bunta Challenge!". By connecting two units, you can also enjoy "Network Battle Game" play. The card system allows players to store information such as the car, wins/loss records and car tune-up status on a special card.

Legend of the Streets

- Game Content & Rules
  Battle rival characters man to man on 6 different courses. Each checkpoint you pass adds time to the overall time limit. The first one across the finish line with the allotted time wins. If you run out of time or cross the finish line second, you lose. Once you've defeated all 24 rival characters, you'll get a chance to race against a hidden rival character (final battle/race). Defeat him and you'll race for the title of street legend against the last hidden rival character (special battle/race). Only when the title is yours will you get to see the ending.

- INITIAL D CARD
  Purchasing a card when you start the game creates your car. The card can store all the data for one car. Information on the card includes the player name, car, tune-up status, names of defeated rival characters, times from Time Attack mode, Network Game records, passwords from Time Attack mode and more. On the Card Screen, the player's name, car name, cleared areas, Key and Speed Demon Level are displayed. The Key is necessary when recording results on the Net Rankings. Speed Demon Level stars (★) increase as various conditions are cleared.

- Car Tune-Ups
  Depending on how well you do, points are added to your card when you use it to play in "Legend of the Streets", "Time Attack", "The Bunta Challenge!" and "Network Battle Race" modes. When you've accumulated enough points, you are given the option of using those points to do tune-ups on your car to increase performance.
● Game Flow

● Accept Challenger Screen, Battle Race Select Screen:
  When network play is disabled, this screen will not appear.
  For a 1-player game only, select "Refuse Challengers" or "Do Not Enter".

● Card Entry Screen and Card Purchase Screen:
  Insert your card if you've got one after completing the Card Purchase Screens. If you don't already have a card, you can purchase one.

● Vehicle Selection Screen:
  This screen isn't displayed if you've already purchased a card.
- Transmission Selection Screen:
  This screen isn't displayed if you've already purchased a card.

- Parts Option Selection Screen:
  If you're purchasing a card, select one of the Parts option. These parts are then attached to your car when you accumulate enough points.

- Name Entry Screen:
  If you're purchasing a card, enter your name (driver's name) at the player name input screen.
● Mode Select Screen:
Select "Legend of the Streets" at the Mode Selection Screen.

● Course and Rival Character Selection Screens

● Rival Character Scenes
• Battle (Race)

• Results Screen

• Tune Up Screen:
  Use your card to play and accumulate points you can put towards performance enhancing tune-ups.
Continue Screen:
Choose to continue or quit after rival character scenes. If you select "YES", nothing is recorded to the card and you can continue playing. If you select "NO", your game data is stored on your card and your game ends.

Time Attack

Game Content & Rules
This is a race against time. The goal is to cross the finish line as quickly as you can. "Direction", "Time of Day" and "Weather" can be selected for each of the six courses - note that on the highest level (Expert 1) time can only be set to Night. Each checkpoint you pass adds time to the overall time limit. When you cross the finish line, a password is displayed. You may use this password to participate in the online Internet rankings.

Note: In order to register the password, you must have played the game with a card and you'll need to enter the 3 digit number of KEY printed on the front of the card.

Four Courses Runaround: A new Time Attack challenge available when the player spends 60000 points from the total saved on their Card. Weather option may be changed.
Player races in order through these courses: Akagi (single Downhill), Akina (single Downhill), Happogahara (single Inbound) and Irohazaka (single Downhill).

Your times, when recorded with the card (or tuned car), are displayed in the "TUNED" ranking. Your time, when not using a card, are displayed in the "NORMAL" ranking. The only way to accumulate points is to play with a card.

The BUNTA Challenge!

Game Content & Rules
Race head-to-head against a single rival (BUNTA), on four different courses: Akagi, Akina, Happogahara and Irohazaka
For each course, only Dry or Night conditions may be selected.
A Card with saved points is necessary to play.
Player must finish ahead within the time limit to win.
Finishing behind or over the time limit means the player loses.
Beating Bunta earns points and increases the Bunta Level for that course by one.
The Bunta Level indicates Bunta's strength; the higher the level the stronger he becomes.
Losing reduces the player's points total.
Network Battle Race

- Game Content & Rules
  Two vehicles race for victory.
  When either car passes a checkpoint, remaining race time will be increased.
  The winner is the car that crosses the finish line first or is occupying first place when time runs out.

  A car built on the Card (Custom Car) may also be used.
  When racing with a Custom Car, results will be saved on the Card.

  Challengers may challenge at any point during the champion side race.
  Cards may not be purchased during a Network Battle Race.

Before the Race

[Champion Side]

- Battle Entry Challenge Request Screen

  When a challenge occurs before the start of the race (during selection phase):

  If the challenge occurs before the mode selection phase (during Car Selection etc), the Network Battle Race Information Screen is displayed directly before the selection phase.
  If the challenge occurs after the selection phase, selection is interrupted and the Network Battle Race Information Screen is displayed.

  When a challenge occurs during the race:

  The race is interrupted and the Network Battle Race Information Screen is displayed.
Network Battle Race Information Screen

The challenger selects the course while the champion waits at the Network Battle Race Information Screen.

[Challenger Side]

Network Battle Race Select Screen

This screen asks if a new player wishes to enter a Battle Race. It only appears when a new player first inserts coins and the current player has opted to accept Battle Race challengers.

Card Entry Screen

When a Battle Race is established, the Card Entry Screen appears. A Battle can be raced even without a Card. If there is no Card, the game proceeds to the Car Selection and Transmission Selection Screens. The Course Selection Screen then appears. The challenger selects the course.
After the Race

- Results Screen

After a battle, the Results Screen appears. Depending on the results, the Battle Level will change.

- Continue Screen

The winning player will receive victory points and will be allowed to continue play. The losing player will go to the Continue Screen.

When the number of victories exceeds the set limit
When a player's total number of victories exceeds the set limit, the player will be taken to the Continue Screen even if they win. (See Section "10-3 F").
Configuration

When a Card is inserted, a number of options may be set. Press the View Change Button at the Card Data Confirmation Screen to go to the Configuration screen. When displaying the configuration Screen, you can select the item by the Shift Lever. After selecting the item, press the Start Button and change the setting by the Steering Wheel. After changing the setting, press the Start Button again to be settled the new settings.

- **BGM**
  Set race background music options
  On: Play BGM as normal (Default Setting).
  Off: Turn BGM off.
  Fix: Play the melody selected at Song Selection. Will play the same BGM until changed.

- **Navigation Display**
  Set options for the Navigation Display that appears at the lower left of the Race Screen.
  On: Show navigation display (Default setting).
  Off: Do not show navigation display.
  Paper Cup: A paper cup full of water appears on the navigation display.

- **Steering**
  Set steering wheel stiffness.
  1 to 9: 1 is the loosest. Stiffness increases up to a maximum setting of 9.
  (Default Setting is 5)

- **Time Display**
  Set the Time Display on the Race Screen.
  Normal: Standard time display. (Default setting)
  Simple: Simplified time display.

- **Force Quit**
  Force end of game during Legend of the Streets and Time Attack play.
  Off: Disable force quit (Default setting)
  On: Enable force quit. Press the Start and Change View Buttons simultaneously to end game.
Game Over

With "Legend of the Streets", "Time Attack" and "Network Battle Race" play, the Continue Screen appears after each race.
If you choose not to continue, the game ends.

Transferring Old Card Data

Card data from the previous version, "Initial D" may be transferred for use with “Initial D Ver. 2”. Not all player data will be transferred to the new Card.

- **Transferable Data:** Points, car model, player name, customization options, Auto/Manual transmission setting, number of plays till next inspection (the number of plays remaining on the Card, plus 50).
- **Non-transferable Data:** Tune-up (Tune-up status is returned to default, but transferred points may be used to re-tune the car), times, race results, Legend of the Streets status.

1. The player inserts coins to start.

   ![DO YOU HAVE AN INITIAL D CARD?](image)

   Player inserts Card at the Card Entry Screen.

2. Player inserts credits at the Transfer Card Data Screen.
3. The old Card will be ejected. This Card can no longer be used.

4. When the Card Data Transferred message appears, the game will restart. The new Card is for exclusive use with the Initial D Ver. 2, and cannot be used with the previous version, Initial D.

Limit on Card Use

Each Card can be used for up to fifty plays, until Car Inspection time is reached. Continued game play after each race is not counted as part of the 50 game limit. Cards may be renewed by transferring data to a new Card (stored points will not be lost). However, if you do not renew your card at the Car Inspection, you will not longer be able to play using the data stored on your card.

10. EXPLANATION OF TEST AND DATA DISPLAY

By operating the switch unit, periodically perform the tests and data check. When installing the machine initially or collecting cash, or when the machine does not function correctly, perform checking in accordance with the explanations given in this section.

The following shows tests and modes that should be utilized as applicable.

This product’s basic system consists of the NAOMI 2 GD-ROM game board. The system enables you to play several games one after the other just by changing a GD-ROM disc and key chip. The product supports, therefore, the following 2 test modes:

(1) System test mode for an automatic self-diagnostic test (generally used by every product that contains the basic system) and a coin assignment (specifically used by this product) and

(2) Game test mode for testing the input/output control devices and setting the difficulty level (specifically used by this product).

This manual does not cover the automatic self-diagnostic test. For more information about the system test mode, see the attached NAOMI NETWORK SYSTEM Service Manual.

10-1 SWITCH UNIT AND COIN METER

WARNING!

Never touch places other than those specified. Touching places not specified can cause electric shock and short circuit accidents.

STOP

IMPORTANT!

- Adjust the sound to the optimum volume, taking into consideration the environmental requirements of the installation location.
- Removing the Coin Meter circuitry renders the game inoperable.

SWITCH UNIT

Open the coin chute door, and the switch unit shown will appear.
The functioning of each SW is as follows:

![](switch_unit_diagram)

FIG. 10. 1 a SWITCH UNIT
* Note: Actual Switch Unit will appear different.

- **SOUND VOLUME SWITCH**: Adjusts sound volume for all of the machines' Speakers.
  (SPEAKER)

- **TEST BUTTON**: For the handling of the test button, refer to the following pages.
  (TEST)

- **SERVICE BUTTON**: Gives credits without registering on the coin meter.
  (SERVICE)

- **DEMAGNETIZER SWITCH**: Eliminates the on-screen color unevenness due to magnetization of CRT. First use this SW before performing the monitor's color adjustment.
  (DEMAG.)

COIN METER

Open the Cashbox Door by using the key to have the Coin Meter appear underneath the Cashbox.

![](coin_meter_diagram)

FIG. 10. 1 b

www.seuservice.com
In the SYSTEM TEST MODE, IC BD functioning can be checked, the monitor adjusted, and the coin setting performed. Refer to NAOMI NETWORK SYSTEM SERVICE MANUAL for the details. Note that the setting of the following items need to be performed in accordance with the instruction given.

- **CABINET TYPE**: 1 PLAYER(S)
- **MONITOR TYPE**: HORIZONTAL
- **SERVICE TYPE**: COMMON

- **NETWORK TYPE**: NONE

The SEQUENCE SETTING items of COIN/CREDIT SETTING are as follows.

- **SEQUENCE SETTING**
  - **SEQUENCE 1**: Number of credits required for starting the game.
  - **SEQUENCE 2**: Number of credits required for continuing the play.
  - **SEQUENCE 3**: Number of credits required for dedicated CARD purchase.
  - **SEQUENCE 4~8**: NOT USED
10-3 GAME TEST MODE

---

**IMPORTANT!**

- When changing the game configuration, changes will not take effect until the Game Test Mode has been completed. Be sure to exit the Game Test Mode properly after configuration changes.
- Do not configure the game in ways not described in this text. It is possible that the game will not function properly.

---

A. GAME TEST MENU MODE

Select GAME TEST MODE from the System Menu screen to display the Game Test Menu screen.

Use the SERVICE Button to move the cursor to the desired test item. Press the TEST Button to enter the selected item.

---

**SYSTEM MENU**

- RAM TEST
- JVS TEST
- SOUND TEST
- C.R.T. TEST
- SYSTEM ASSIGNMENTS
- COIN ASSIGNMENTS
- BOOKKEEPING
- BACKUP DATA CLEAR
- CLOCK SETTING

</tbody>
</table>

PRESS TEST AND SERVICE BUTTON TO EXIT

FIG. 10. 3 b INPUT TEST Screen

Test the STEERING, ACCEL and BRAKE controls to ensure that they are functioning properly and that the parameters change smoothly as each input device is operated.

Display N, UP and DOWN using the GEAR POSITION. N should display there is no control input. Verify that both UP and DOWN display in sync with the position of the shift knob.

Press the START, CHANGE VIEW, SERVICE and TEST Buttons. If functioning correctly, each indicator will switch from OFF to ON.

![Control Panel](image)

Note: Control Panel differs from Image.

Press the SERVICE and TEST Buttons simultaneously to return to the Game Test Menu screen.
C. OUTPUT TEST

Select OUTPUT TEST to display the following screen and check the status of each lamp. This test should be used periodically to check that the lamps are functioning correctly.

![OUTPUT TEST Screen](image)

The cursor toggles automatically between START Button and CHANGE VIEW Button, and each lamp lights up.

Move the cursor to EXIT and press the TEST Button to return to the Game Test Menu screen.
D. FORCE FEEDBACK

If you select FORCE FEEDBACK, the STEERING will rotate automatically when you press the TEST Button. The STEERING will also rotate automatically during FORCE TEST. Make sure that no one is touching the STEERING before running these tests as contact may cause injury.

When you select "FORCE FEEDBACK", a connection test runs and the STEERING rotates. When the connection check completes, a screen similar to the one below is displayed, and you may adjust the STEERING resistance.

![FIG. 10. 3 d FORCE FEEDBACK Screen](image)

- **FORCE:** Set the STEERING resistance
  The smaller the value, the weaker the resistance; the larger the value, the stronger the resistance.
  (Minimum value is 0; the maximum value is 10. The default setting is 4.)
  Move the cursor to UP or DOWN and press the TEST Button to change the value.

- **FORCE TEST:** Verifies the STEERING motor is working properly
  Conducted when the STEERING resistance is set at 4.
  Toggle between OFF and ON by aligning to CENTER and pressing the TEST Button.
  The STEERING will rotate and stop in the center position. Pressing the SERVICE Button moves the cursor to the next menu item and CENTER changes to OFF. Control of the STEERING is then released.
  When the RIGHT menu item is ON, the STEERING rotates to the right as far as possible and then stops. Press the SERVICE Button again to turn it OFF and release control of the STEERING.
  When the LEFT menu item is ON, the STEERING rotates to the left as far as possible and then stops. Press the SERVICE Button again to turn it OFF and release control of the STEERING.

Move the cursor to EXIT and press the TEST Button to return to the Game Test Menu screen.
E. INPUT ASSIGNMENTS

Select INPUT ASSIGNMENTS to display the following screen.

![INPUT ASSIGNMENTS Screen](FIG. 10. 3 ea INPUT ASSIGNMENTS Screen)

You can adjust each of the menu items by moving the cursor to the menu item and pressing the TEST Button.

Return all settings to the default settings with DEFAULT SETTING.

- **STEERING:** Make adjustments to STEERING
  Press the TEST Button to display the following screen.

![STEER ASSIGNMENTS Screen](FIG. 10. 3 eb STEER ASSIGNMENTS Screen)

Center the STEERING. When the "0" displayed is not exactly aligned with the "^" mark above CENTER, use the cursor to select RIGHT or LEFT and move the "0" until it is displayed directly above the "^" mark.

Move the cursor to RIGHT and press the TEST Button to move the "0" to the right. Each time you press the TEST Button, "0" moves slightly to the right. Move the cursor to LEFT and press the TEST Button to move the "0" to the left. Each time you press the TEST Button, "0" moves slightly to the left.

Move the cursor to EXIT and press the TEST Button to return to the INPUT ASSIGNMENTS screen.
● ACCEL: Make adjustments to ACCEL
Press the TEST Button to display the following screen.

Adjust the distance between "0" displayed and the "^" mark equally so that when your foot is off the ACCEL pedal, the "0" on the left is aligns with the "^" above MIN and when you press the ACCEL pedal down all the way, the "0" on the right is aligns with the "^" mark above MAX.

Move the cursor to RIGHT and press the TEST Button to move "0" to the right. Each press of the TEST Button moves "0" slightly to the right.

Move the cursor to LEFT and press the TEST Button to move "0" to the left. Each press of the TEST Button moves "0" slightly to the left.

Move the cursor to EXIT and press the TEST Button to return to the INPUT ASSIGNMENTS screen.

SEAT NUMBER       NO DEFINED
CARD R/W          ON
CONTINUE          ON
MAX WIN STREAK    INFINITY
->EXIT

SELECT WITH SERVICE BUTTON
AND PRESS TEST BUTTON
```

FIG. 10. 3 f GAME ASSIGNMENTS Screen

The GAME DIFFICULTY and CONTINUE menu items can be set only when the SEAT NUMBER is set to either 1 or NO DEFINED. The MAX WIN STREAK menu item can be set only when the SEAT NUMBER is set to 1.

- **GAME DIFFICULTY:** Set the level of difficulty for the game
  You may select one of 5 different levels of difficulty: VERY EASY, EASY, NORMAL, HARD or VERY HARD.
  This setting does not affect the speed of rivals in "Legend of the Streets" mode.

- **DEFAULT VIEW:** Set the view perspective at the start of races
  You may select one of the following 2 settings: DRIVER view or REAR view.

- **SEAT NUMBER:** Assign seat numbers to seats in each arcade unit for network play
  If you have two arcade units side by side, make sure you assign different seat numbers; the seat on the left would be 1 and the one on the right would be 2. If the unit will not be used for network play, set the SEAT NUMBER to NO DEFINED.
  You may select one of the following 3 settings: 1, 2 or NO DEFINED.

- **CARD R/W:** Set to ON if using the Card Reader/Writer.
  Set to OFF when not using the Card Reader/Writer.

- **CONTINUE:** Enable/Disable Continue function.
  ON: Enables Continue for Legend of the Street Time Attack and Network Battle Race games.
  OFF: Disable Continue.

- **MAX WIN STREAK:** Set maximum possible wins in the Battle Race game
  1/3/5/10/20/30: Causes the continue screen to appear when the number of wins exceeds the indicated limit.
  INFINITY: Play continues without inserting new coins as long as the player continues to win.
Changes to settings are not enabled until Test Mode is exited. After changing settings, be sure to exit Test Mode.

After changing the settings, select EXIT and press the TEST Button to return to the Game Test Menu screen.

CARD R/W TEST

Clean the card reader/writer periodically.

Test the functionality of or clean the CARD R/W (read/writer). The CARD R/W should be tested and cleaned periodically.

The cursor can move to the following items:

- INITIALIZE: Initialization
- CLEANING: Cleaning
- CHECK R/W: R/W Operation Check

Move the cursor to EXIT and press the TEST Button to return to the Game Test Menu screen.
Depending on the R/W running mode, one of the following is displayed in "*****" in "CARD R/W STATUS : *****":

READY ....... Now waiting (Clear to Send Command)
INITIAL ....... Now initializing (Not Clear to Send Command)
CLEAN ....... Now cleaning (Not Clear to Send Command)
GET ............ Cards are being taken out from the dispenser (Not Clear to Send Command)
SAVE .......... Sample data is saved onto the card (Not Clear to Send Command)
PRINT .......... Sample data is printed onto the card (Not Clear to Send Command)
LOAD .......... Load card data and compares it with sample data (Not Clear to Send Command)
OUT ............ Eject cards (Not Clear to Send Command)
SHUTTER ....... Now closing/opening the shutter (Not Clear to Send Command)
ERROR ....... Error (Clear to Initialize Command Only)

While a status with a note of "Not Clear to Send Command " in parentheses is on-screen, no operations are accepted. If such a status has occurred, wait until the operation in that status stops automatically and the display comes to READY.

Occasionally, the "INFORMATION" field on the screen outputs one of the instructions below. It usually displays nothing (blank), although it displays NO ERROR when each item is completed normally.

While cleaning is in progress, waiting in the ready mode for inserting a cleaning card:

-- PLEASE INSERT CLEANING CARD --

After the operation check, waiting for the ready mode for ejecting the card:

-- PLEASE REMOVE --

When an error occurs, its type are displayed in the "INFORMATION" field:

NO ERROR .................. Normal completion
CAN'T LOAD ................ Loading Error
CAN'T SAVE ................. Writing Error
DRAW CARD ERROR ...... Error in Taking Card from dispenser
CARD STUFFED ............ Card Jamming
SHUTTER ERROR .......... Shutter Error
WRONG DATA .............. Data Error, Dispenser Card Empty
CONNECTION ERROR ....... Connection Error
SCIF ERROR ................. RC-232C Communication Error
UNKNOWN ERROR ............ Unknown Error

The "---" field in "CHECK R/W : ---" shows the result of the operation check.
--- .................. Not checked
OK .................... No failure
NG .................... Failure
CLEANING PROCESS

Cleaning refers to the optional cleaning of the heads on the CARD R/W. Refer to section <7-2> Head Cleaning for details on the use of the cleaning card.

- Select "CLEANING" and press the TEST Button.
- If the CARD R/W is not initialized, it will be initialized first. :INITIALIZE is displayed.
- The following message appears to show that the R/W is ready for insertion of the cleaning card:
  -- PLEASE INSERT CLEANING CARD --
- Insert the cleaning card into the R/W.
  On the screen, the status display is replaced with "CLEAN", and cleaning begins.
- Once cleaning ends after a lapse of a certain time, the R/W automatically ejects the card.
  The status display changes from "CLEAN" to "READY."
  NO ERROR is displayed on the screen.

TESTING FUNCTIONALITY

The operation check takes out each card from the dispenser, and writes the sample data onto it. The check then loads and reads it, and checks whether the read data matches the sample data. Then, the check ejects the card. When you draw out the card at this time, the entire process of the check is completed. The functionality test uses 1 card from the dispenser.

- Select "CHECK R/W" and press the TEST button.
  R/W operates automatically as follows:
- If the CARD R/W is not initialized, it will be initialized first. :INITIALIZE is displayed.
- Close the shutter: SHUTTER is displayed.
- Takes out the card from the dispenser: GET is displayed.
- Saves the sample data onto the card: SAVE is displayed.
- Print the sample data onto the card: PRINT is displayed.
- Loads the data on the card for comparison with the sample data: LOAD is displayed.
- Open the shutter: SHUTTER is displayed.
- Ejects the card: OUT is displayed.
- Draws out the card. Now the entire process of the check is completed.

If execution of the operation check results in display of NG, check the error condition. If you can take action against the error, execute the operation check again after you take the proper action. If you cannot take action against the error, repeat the check several times. If the result of the check is still NG, clean the R/W. If the subsequent execution of the operation check still results in NG, the R/W may be faulty.

If an error occurs, it is cleared by executing the INITIALIZE command. Note that, when an error has occurred, the R/W only accepts this command (except EXIT).
H. CLOSE SETTING

Select CLOSE SETTING to display the following screen.
Change the setting for the time when the store closes.
The game will be unusable for card play starting 15 minutes before the time you set until 6:00 AM the next morning.

<table>
<thead>
<tr>
<th>GAME TEST MODE</th>
</tr>
</thead>
<tbody>
<tr>
<td>CLOSE SETTING</td>
</tr>
<tr>
<td>SCHEDULE TYPE : DAY</td>

Press the TEST Button to move to screen 6/7 of BOOKKEEPING.
Press the TEST Button to move to screen 7/7 of BOOKKEEPING.

Press the TEST Button to exit.
J. BACKUP DATA CLEAR

Delete all BOOKKEEPING screen data. Use BACKUP DATA CLEAR in the SYSTEM TEST MODE to delete data about coin/credit collection. Deleting this data does not affect the game settings or other data stored by the game. Deleting this data will delete the data showing how many times the CARD R/W was used. After deleting the data, the CARD R/W automatically enters Head Cleaning mode. Refer to section <7-2> Head Cleaning for more information about head cleaning.

![FIG. 10. 3 j BACKUP DATA CLEAR Screen](image)

To clear data, use the SERVICE Button to move the cursor to YES (CLEAR) and then press the TEST Button. When the data has been cleared, the message "COMPLETED" will be displayed.

Press the TEST Button again to return to the Game Test Menu screen.

Move the cursor to NO (CANCEL) and press the TEST Button to return to the Game Test Menu screen without clearing the data.
11. CONTROL PANEL

**WARNING:**

- In order to prevent an electric shock and short circuit, be sure to turn power off before performing work by touching the interior parts of the product.
- Be careful not to damage the wires. Damaged wires may cause electric shock or short circuit or present a fire risk.
- Do not touch undesigned places. Touching places not designated can cause electric shock or short circuit.
- This work should be performed by the Location's Maintenance Man or Serviceman. Performing work by non-technical personnel can cause electric shock hazard.
- Do not perform work other than those specified in this Manual in order to prevent accidents during performing work and operation after performing work. Performing work not specified in this Manual may require special training for this product. If performing work other than those stated in this manual is required for repair, contact the offices herein stated in this manual or where you purchased the product from and ask for repair or inquire how to repair.
- Be very careful when soldering. Handling a soldering iron carelessly may result in a fire or a burn.
- Be extremely careful when heating the heat-shrinkable tube. Failure to do so may result in a fire or burns.

**CAUTION:**

- Exercise extreme caution when handling the internal parts of the Control Panel. Watch out for damage, warping and loss. The loss of just one piece may result in damage to or lead to faulty operation of the entire unit.
- When securing the plastic-made parts, do not excessively fasten screws and nuts. Failure to observe this may damage the parts and cause injury due to fragments resulting from damage.

**IMPORTANT:**

Be sure to perform volume's move value setting in the Volume Setting in the Test Mode after replacing or adjusting the Volume.
11-1 ADJUSTING/REPLACING THE VOLUME

**ADJUSTMENT PROCEDURE**

- Loosen the 2 screws that secure the VR Bracket and move the VR Bracket to adjust the angle and condition of the gear alignment.

- Keeping the handle straight, align the gears so that the direction of the D Cut side of the Volume Shaft matches that shown in the diagram.

- Tighten the 2 screws and secure the VR Base.

![Diagram showing VR Bracket and screws](image)

**FIG. 11. 2 a**

- After making adjustments, use the Volume Setting Screen to set the Volume (refer to 10-3E). The recommended value for the handle Volume is "80H" when the handle is set straight. Verify that the value decreases when the handle is rotated to the left and increases when rotated to the right. Use the Test Mode to view the Volume value (refer to 10-3B).
REPLACEMENT PROCEDURE

This procedure requires the following tools: Philips screwdriver for the M4 screws, 2 mm hexagonal wrench, 11—12mm monkey wrench, nipper, cutter, wire stripper, soldering iron and industrial dryer.

- Remove the connectors.

- Remove the 2 screws securing the VR Bracket and remove the entire Bracket and Volume.

- Loosen the 2 hexagon socket screws on the Gear Holder and remove the Gear Holder.

- Remove the nut securing the VR Bracket, then separate the Volume from the VR Bracket and replace it.

11-2 GREASING

**WARNING:**
- Grease is inflammable and must never be close to fire.
- Grease may be apt to be erroneously used or drunk, and must not be placed in a location where children can access.

**CAUTION:**
- Grease does harm to your body if you aspirate it. Do not perform any work related to grease in a location where ventilation is insufficient.
- If grease enters an eye, eye irritation may be caused. Take care to prevent it from entering your eyes (for example, by wearing protective goggles). Should grease enter an eye, rinse it in clean water and have your illness diagnosed by a doctor.
- If grease touches a human skin, skin irritation may be caused. Take care to prevent grease from touching your skin (for example, by wearing protective gloves). Should grease touch your skin, fully wash it using water and soap.

**STOP**

**IMPORTANT:**
- Be sure to use the designated type of grease. If a non-designated type grease is used, components may break.
- The period for greasing specified herein is a standard. Apply greasing to the specified portions as occasion arises.

Use spray grease once every three months to grease up the gear mesh portion of the constituent parts.
Use "Grease Mate" (part number 090-0066) for the spray grease.

Note: Image Differs from actual Unit. FIG. 11. 3
12. SHIFT LEVER

In the Test Mode, if the SHIFT LEVER's SW can not be inputted satisfactorily, replace the Switch. Apply greasing to the Mechanism's sliding portion once every 3 months. When performing the above work, remove the Shift Lever Unit.

WARNING:

- Before starting to work, ensure that the Power SW is OFF. Failure to observe this can cause electric shock and short circuit hazards.
- Use care so as not to damage wirings. Damaged wiring can cause electric shock and short circuit hazards.

12-1 REMOVING THE SHIFT LEVER

- Turn the Power SW off.
- Remove the 4 Tamperproof Screws to lift the Shift Lever Unit.
- Disconnect the Connector to remove the Shift Lever Unit.
- When reinstalling, follow the procedure opposite as when removing. At this time, ensure that "DOWN" display appears on the upper part as shown.
- After reinstalling, be sure to check INPUT TEST in the test mode. (See 10-3B.)

12-2 SWITCH REPLACEMENT

- Disconnect the wiring Connector of the Switch to be replaced.
- Remove the 2 Tapping Screws to replace the Microswitch.

12-3 GREASING

Apply greasing once in 3 months to the specified portions. For spray grease, use NOK KLUBER L 60 or Grease Mate (Part No. 090-0066).
13. ACCELERATOR & BRAKE

**WARNING:**

- Before starting to work, ensure that the Power SW is OFF. Failure to observe this can cause electric shock or short circuit.
- Use care so as not to damage wirings. Damaged wiring can cause electric shock or short circuit.
- Do not touch undesignated places. Touching places not designated can cause electric shock or short circuit.
- This work should be performed by the Location's Maintenance Man or Serviceman. Performing work by non-technical personnel can cause electric shock hazard.
- When performing work such as parts replacement other than those specified in this manual, be sure to contact where you purchased the product from. Confirm the work procedures and obtain precautions from where you purchased the product prior to performing work. Inappropriate parts replacement and/or installation with erroneous adjustment can cause an overload or the parts to come into contact, resulting in an electric shock, a short circuit, and a fire.

**STOP**

Be sure to perform volume's move value setting in the Volume Setting in the Test Mode after replacing or adjusting the Volume. (See 10-3E.)

If Accel. and Brake operation is not satisfactory, adjustment of volume installation position or volume replacement is needed. Also, be sure to apply greasing to the gear mesh portion once every 3 months.

13-1 ADJUSTING OR REPLACING THE VOLUME

The following tools are required for the operations below: Phillips screwdrivers for M4 and M5. The appropriate value for both ACCEL. Volume and Brake Volume is under 30H when released and over C0H when stepped on. Check Volume values in the TEST mode. Since work is performed inside the energized cabinet, be very careful so as not to touch undesignated places. Touching places not specified can cause electric shock or short circuit.

**ADJUSTING PROCEDURE**

- Take out the 2 truss screws and remove the Front Cover from the Accel. & Brake Unit (FIG. 13. 1 a).
REPLACING THE VOLUME

- Turn the power off.
- Take out the 2 screws and remove the Potentiocover (FIG. 13.1 c).
- Disconnect the connector of the volume to be replaced.
- Remove the screw which secures the Potentiobase (FIG. 13.1 b).
- Remove the Potentiobase together with the volume as is attached. (FIG. 13.1 c)
- Remove the base and the gear to replace the volume.
- Adjust the volume as per the previous page after replacing.

13-2 GREASING

STOP

Be sure to use the designated grease. Using undesignated grease can cause parts damage.

Use spray grease once every three months to grease up the Spring and gear mesh portion. For spray greasing, use GREASE MATE (PART No. 090-0066).

- Loosen the screw which secure the Potentiobase, and adjust the Volume value by moving the Base. (FIG. 13.1 b)
- Secure the Potentiobase.
- Perform volume setting in the volume setting mode.
14. COIN SELECTOR

HANDLING THE COIN JAM

If the coin is not rejected when the REJECT button is pressed, open the coin chute door and open the selector gate. After removing the jammed coin, put a normal coin in and check to see that the selector correctly functions.

CLEANING THE COIN SELECTOR

- Remove and clean smears by using a soft cloth dipped in water or diluted chemical detergent and then squeezed dry.
- Never apply machine oil, etc. to the Coin Selector.
- After cleaning the Coin Selector, insert a regular coin in the normal working status and ensure that the Selector correctly functions.

The coin selector should be cleaned once every 3 months. When cleaning, follow the procedure below:

(1) Turn the power for the machine OFF. Open the coin chute door.
(2) Remove the coin selector from the coin chute door.
(3) Open the gate and dust off by using a soft brush (made of wool, etc.).
(4) Remove and clean smears by using a soft cloth dipped in water or diluted chemical detergent and then squeezed dry.
(5) Remove the CRADLE.
   When removing the retaining ring (E ring), be very careful so as not to bend the rotary shaft.
(6) Remove stain from the rotary shaft and shaft receiving portions by wiping off with a soft cloth, etc.
(7) After wiping off as per (6) above, further apply a dry cloth, etc. to cause the coin selector to dry completely.

COIN INSERTION TEST

Once every month, when performing the Coin SW Test, simultaneously check the following:

- Does the Coin Meter count satisfactorily?
- Does the coin drop into the Cashbox correctly?
- Is the coin rejected when inserted while keeping the Reject Button pressed down?
15. PERIODIC INSPECTION TABLE

The items listed below require periodic check and maintenance to retain the performance of this machine and to ensure safe business operation. When handling the controller, the player will be in direct contact with it. In order to always allow the player to enjoy the game, be sure to clean it regularly. Also, it is advisable to provide wet tissue, etc. available for player use.

Be sure to check once a year to see if Power Cords are damaged, the plug is securely inserted, dust is accumulated between the Socket Outlet and the Power Plug, etc. Using the product with dust as is accumulated can cause fire and electric shock hazards.

Never use a water jet, etc. to clean inside and outside the cabinet. If wetness occurs for any reason, do not use the product until it has completely dried.

Periodically once a year, request the place of contact herein stated or the Distributor, etc. where the product was purchased from, as regards the internal cleaning. Using the product with dust as is accumulated in the interior without cleaning can cause a fire or accident. Note that cleaning the interior parts can be performed on a pay-basis.

CLEANING THE CABINET SURFACES

When the cabinet surfaces are badly soiled, remove stains with a soft cloth dipped in water or diluted (with water) chemical detergent and squeezed dry. To avoid damaging surface finish, do not use such solvents as thinner, benzine, etc. other than ethyl alcohol, or abrasives, bleaching agent and chemical dustcloth.

SEAT (Greasing to Seat Rail Portion)

Move the Seat to the rearmost position and apply spray greasing to the portion shown at the right once every 3 months by using NOK KLUBER L60 or GREASE MATE SEGA PART No. 090-0066. After greasing, move the Seat a few times forward and backward so as to allow the grease to be applied all over uniformly. Be sure to wipe grease which attaches to the surfaces of the PROTECT RUBBER on the Seat Rail, or any excess grease.

FIG. 15
16. TROUBLESHOOTING

16-1 CARD READER/WRITER

If this machine detects an error during the operation of the Card Reader/Writer, it will display the error messages listed below. Perform the appropriate maintenance based on the content of the error message displayed.

Should an error occur, do not attempt to open the top cover of the Card Reader/Writer. The unit will attempt to save the data to the customer's card and restore the game if the top cover is closed and the RESTORE command (hold down the Start button + Change View button for a short time) is used. However, attempting to use the RESTORE command after the top cover has been opened may force the game to shut down and not save data to the card.

When the game shuts down or the unit is reset, the data on the customer's card is not saved. In order to save customer data, perform the proper maintenance carefully.

</tbody>
</table>
In case fuse replacements other than those stated in this manual are necessary, contact where you purchased the product from for inquiries regarding this matter.

Fuse replacements other than those specified can cause accidents and are strictly forbidden.

In order to prevent an electric shock, be sure to turn power off and unplug from the socket outlet before performing work by touching the internal parts of the product.

Be careful so as not to damage wirings. Damaged wiring can cause electric shock and short circuit accidents.

Be sure to use fuses meeting specified rating. Using fuses exceeding the specified rating can cause fire and electric shock accidents.

After eliminating the cause of the blowing of fuse, replace the fuse. Depending on the cause of fuse blowing, continued use with the fuse as is blown can cause generation of heat and fire hazard.
17. GAME BOARD

**WARNING!**
- In order to prevent electric shock and short circuit hazards, be sure to turn power off before performing work.
- Be careful not to damage the wires. Damaged wires may cause electric shock or short circuit or present a fire risk.
- Do not expose the Game BD, etc. without a good reason. Failure to observe this can cause electric shock hazard or malfunctioning.

**CAUTION!**
Static electricity from your body may damage some electronics devices on the IC board. Before handling the IC board, touch a grounded metallic surface so that the static electricity can be discharged.
17-1 REMOVING THE GAME BOARD

- Follow the above described action to open cabinet
- Remove all the connectors from the filter board on the Game Board. Also remove the GD cable connector from the DIMM board.
- Remove the 4 screws that fix the Game Board.

</table>

FIG. 18. 3

- Cause all of the machines to exit from the test mode. After the test mode, the screens proceed to and display the Network Check.

- When network checking is finished, the system displays Advertise Screen. This indicates successful completion of setting. If SEAT NUMBER setting is wrong, Network Check Screen appears, but it does not change to Advertise Screen. Normally the Network Check takes several 10 seconds. If the screen does not proceed from the Network Check screen, some sorts of errors such as incorrect setting, incorrect connection or malfunctioning of the communication cable can be considered.

18-2 NETWORK PLAY PRECAUTIONS

STOP IMPORTANT

- In network play, difficulty level and other settings are made from Seat Number 1. Changing the settings at Seat Number 1 also changes the settings for Seat Number 2. Settings for Seat Number 2 cannot be changed from Seat Number 2 and so will not appear in the list of settings.

- Should a network connection fail during network play, gameplay will be suspended and the Network Check Screen will be displayed.

- If one of the units attached for network play enters Test Mode, the other unit will display the Network Check Screen.

- Even when units are connected for network play, each seat, each game may be given different cost settings. Incorrect cost settings may cause budget balancing problems.

The operation of a unit when connected to another for network play is different than that of a stand-alone unit. Administration of network units should be handled carefully. Entering Test Mode will cause any other machines set up for network play to display the Network Check Screen. When customers are playing the game, do not enter Test Mode on any network play-enabled machine.
If you have lost your Original Owners manual which shipped with your Plasma display a replacement manual may be downloaded in PDF format from www.zenith.com.
P40V22 40" Plasma EDTV Monitor Display

Dimensions

- Screen Size: 40"
- Resolution Display: 640 x 480p
- Pixel Pitch: 0.417 (H) x 1.252 (V)
- Aspect Ratio: 4:3
- Brightness: 370 cd/m²
- Contrast Ratio: 500:1
- Viewing Angle: 160°
- Formatter Conversion: Intelligent Images Scanning
- Aspect Ratio Correction: Yes
- Scan Converter: LGE
- Contrast: Yes
- Brightness/Sharpness: Yes
- Tint: Yes

Accessories

- Anti Reflection Screen: Yes

Cabinet Description

- Finish: Brushed Silver
- Cabinet Style: Slim Frame
- Power Consumption: 350W
- Power Source: 115v 60Hz

Remote Control

- Transmitter Model Number: SC352
- Transmitter Finish: Brushed Silver

Video Enhancements

SPECIAL FEATURES

- Trilingual Menus: English/Spanish/French
- Shock Absorbing Glass Damper: Yes, Tilt to 20°
- Fan Free, Noise Free: Yes
- Auto-Power On: Yes
- Discrete Power Off: Yes
- Last Source On: Yes
- Image Sticking Minimization: Yes

Output Resolutions

- NTSC, YCA: 640 x 480p
- EDTV: 640 x 480p

Operating Environments

- Humidity Range: 20 – 80%
- Altitude: 2,000m
- Operating Temperature: 0° – 40° C

Required Approvals

- UL, C-UL, NOM
- UL, C-UL, FCC (B)

Service/Limited Warranty

- Warranty: Parts/Labor 1 Year/1 Year
- MTBF (Approx.): 310 Hours
- Customer Service: 1-888-865-3026

Dimensions and weights are approximate. Design and specifications subject to change without notice.

Your Zenith Plasma Display Warranty

Plasma Display  Welcome to the Zenith family! We believe that you will be pleased with your new Zenith Plasma Display. Please read this warranty carefully, it is a "ONE-YEAR LIMITED WARRANTY" on parts and labor. This warranty gives you specific legal rights, and you may also have other rights that vary from state to state within the U.S.A.

ZENITH’S RESPONSIBILITY

Service Labor  During a period of one year from the effective warranty date, Zenith will provide, when needed, service labor to repair a manufacturing defect. The determination of service will be made by the Zenith Factory Service Center (see Service below).

Parts  New or remanufactured replacements for factory-defective parts will be supplied by the Zenith Factory Service Center for one year from effective warranty date. Such replacement parts are warranted for the remaining portion of the original warranty period.

Service  During the one-year warranty period, Zenith will, at its option in its sole discretion, repair or replace defective parts, including replacement of the entire Plasma Panel. Please call 877-993-6484 to obtain service (see below).

Not Covered  This warranty covers manufacturing defects and does not cover installation, adjustment of customer controls, installation or repair of antenna systems, cable converters or cable company-supplied equipment; it also does not cover damage due to misuse, abuse, negligence, acts of God or other causes beyond the control of Zenith. Any alteration of the product after manufacture voids this warranty in its entirety.

THIS WARRANTY IS IN LIEU OF ANY OTHER WARRANTY, EXPRESSED OR IMPLIED, INCLUDING WITHOUT LIMITATION, ANY WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE, AND ZENITH SHALL NOT BE LIABLE FOR ANY CONSEQUENTIAL, INDIRECT, OR INCIDENTAL DAMAGES OF ANY KIND, INCLUDING LOST REVENUES OR PROFITS IN CONNECTION WITH THIS PRODUCT. SOME STATES DO NOT ALLOW LIMITATIONS ON HOW LONG AN IMPLIED WARRANTY LASTS OR THE EXCLUSION OR LIMITATION OF INCIDENTAL OR CONSEQUENTIAL DAMAGES, SO THE ABOVE LIMITATIONS OR EXCLUSIONS MAY NOT APPLY TO YOU.

OWNER’S RESPONSIBILITY

Effective Warranty Date  Warranty begins on the date of sale to the end user. For your convenience, keep the dealer's dated bill of sale or delivery ticket as evidence of the purchase date.

Operating Guide  Read your Operating Guide carefully so that you will understand the operation of your Plasma Display and how to adjust the customer controls.

Important  Important—Please fill out and mail your Product Registration Card. It is imperative that Zenith knows how to reach you promptly if we should discover a safety problem that could affect you.

Warranty Service  For warranty service information; contact the Zenith Customer Support phone line below. Parts and service labor that are Zenith’s responsibility (see above) will be provided without charge. Other service is at the owner's expense. If you have any problem in obtaining satisfactory warranty service, write the Zenith Customer Information Center. You must provide the model number, serial number and date of purchase or date of original installation. Before you ask for warranty service, read your operating guide. You might avoid a service call.

Address for Customer Information Center
Zenith Customer Information Center
PO Box 240007
201 James Record Road
Huntsville, AL 35824

Monitor Installation

- Remove screws from the stabilizer bar and turn it upside down. Reinstall the screws and the bar should appear as shown in the above figure. All the hardware for his setup will be mounted to its associated part provided in the installation kit or into existing T-Nuts on the game.

- Remove control panel cover to gain access to uppermost bolts and install the vertical monitor support tubes.

- Insure that the six tapped holes for mounting the rear cover are visible prior to securing the carriage bolts. There are two tapped holes on the opposite side of each tube for securing the front cover.

- Reinstall the plastic cover utilizing the original hardware and install the metal front cover with the four screws provided.
Install the left and right monitor support brackets using the existing hardware on the back of the monitor. Upon completion, also secure the spill guard to the top of the monitor using the monitor hardware.

Using the hardware provided, install the monitor backplate and the left and right U-brackets to the monitor support brackets installed in figure 5. Additionally, secure the two monitor control covers provided to the bottom on the monitor using the existing monitor hardware.

Mount the monitor with its associated brackets to the two tubes you installed earlier. Once secured, connect the two cables extending through the hole in the lower cabinet (Video & Power) to the appropriate inputs on the monitor. Insert any excess cable back into the hole.

When the monitor is secured and the cables are tucked away, install the rear cover using the 6 tamper proof screws provided.

When the installation is complete, the back of the game should appear as shown. Install the lock provided through the holes on the U-Brackets to provide additional security.

<td>SPEAKER BOX 8OHM 20W VA1</td>
<td></td>
</tr>
<tr>
<td>201</td>
<td>000-P00512-W</td>
<td>M SCR PH W/FS M5×12</td>
<td></td>
</tr>
</tbody>
</table>
## 22. WIRE COLOR CODE TABLE

THE WIRE COLOR CODE is as follow:

<table>
<thead>
<tr>
<th>Letter</th>
<th>Color</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>PINK</td>
</tr>
<tr>
<td>B</td>
<td>SKY BLUE</td>
</tr>
<tr>
<td>C</td>
<td>BROWN</td>
</tr>
<tr>
<td>D</td>
<td>PURPLE</td>
</tr>
<tr>
<td>E</td>
<td>LIGHT GREEN</td>
</tr>
</tbody>
</table>

Wires other than those of any of the above 5 single colors will be displayed by 2 alphanumeric characters.

<table>
<thead>
<tr>
<th>Number</th>
<th>Color</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>RED</td>
</tr>
<tr>
<td>2</td>
<td>BLUE</td>
</tr>
<tr>
<td>3</td>
<td>YELLOW</td>
</tr>
<tr>
<td>4</td>
<td>GREEN</td>
</tr>
<tr>
<td>5</td>
<td>WHITE</td>
</tr>
<tr>
<td>7</td>
<td>ORANGE</td>
</tr>
<tr>
<td>8</td>
<td>BLACK</td>
</tr>
<tr>
<td>9</td>
<td>GRAY</td>
</tr>
</tbody>
</table>

If the right-hand side numeral of the code is 0, then the wire will be of a single color shown by the left-hand side numeral (see the above).

Note 1: If the right-hand side alphanumeric is not 0, that particular wire has a spiral color code. The left-hand side character shows the base color and the right-hand side one, the spiral color.

<Example> 51 ……… WHITE / RED

Note 2: The character following the wire color code indicates the size of the wire.

<table>
<thead>
<tr>
<th>Letter</th>
<th>Size</th>
</tr>
</thead>
<tbody>
<tr>
<td>U</td>
<td>AWG16</td>
</tr>
<tr>
<td>K</td>
<td>AWG18</td>
</tr>
<tr>
<td>L</td>
<td>AWG20</td>
</tr>
<tr>
<td>None</td>
<td>AWG22</td>
</tr>
</tbody>
</table>
Warranty

Your new Sega Product is covered for a period of 90 days from the date of shipment. This certifies that the Printed Circuit Boards, Power Supplies and Monitor are to be free of defects in workmanship or materials under normal operating conditions. This also certifies that all Interactive Control Assemblies are to be free from defects in workmanship and materials under normal operating conditions. No other product in this machine is hereby covered.

Sellers sole liability in the event a warranted part described above fails shall be, at its option, to replace or repair the defective part during the warranty period. For Warranty claims, contact your Sega Distributor.

Should the Seller determine, by inspection that the product was caused by Accident, Misuse, Neglect, Alteration, Improper Repair, Installation or Testing, the warranty offered will be null and void.

Under no circumstances is the Seller responsible for any loss of profits, loss of use, or other damages.

This shall be the exclusive written Warranty of the original purchaser expressed in lieu of all other warranties expressed or implied. Under no circumstance shall it extend beyond the period of time listed above.
