Before using this product, read this OWNER'S MANUAL carefully to understand the contents herein stated.

After reading this manual, be sure to keep it available nearby the product or elsewhere convenient for referring to it anytime when necessary.

SEGA ENTERPRISES, LTD.

MANUAL NO. 420-6325-03
BEFORE USING THE PRODUCT, BE SURE TO READ THE FOLLOWING:

To maintain the safety:

To ensure the safe usage of the product, be sure to read the following before using the product. The following instructions are intended for the users, operators and the personnel in charge of the operation of the product. After carefully reading and sufficiently understanding the warning displays and cautions, handle the product appropriately. Be sure to keep this manual nearby the product or elsewhere convenient for referring to it when necessary.

Herein, explanations which require special attention are enclosed with dual lines. Depending on the potentially hazardous degrees, the terms of DANGER!, WARNING!, CAUTION!, etc. are used. Be sure to understand the contents of the displays before reading the text.

<table>
<thead>
<tr>
<th>DANGER!</th>
<th>Indicates that mishandling the product by disregarding this pictograph will cause severe injury or death.</th>
</tr>
</thead>
<tbody>
<tr>
<td>CAUTION!</td>
<td>Indicates that mishandling the product by disregarding this caution will cause a slight hazardous situation which can result in personal injury and or material damage.</td>
</tr>
<tr>
<td>WARNING!</td>
<td>Indicates that mishandling the product by disregarding this warning will cause a potentially hazardous situation which can result in death or serious injury.</td>
</tr>
<tr>
<td>STOP</td>
<td>Indicates that mishandling the product by disregarding this display can cause the product's intrinsic performance not to be obtained, resulting in malfunctioning.</td>
</tr>
</tbody>
</table>

For the safe usage of the product, the following pictographs are used:

- Indicates "HANDLE WITH CARE." In order to protect the human body and equipment, this display is attached to places where the Owner's Manual and or Service Manual should be referred to.
- Indicates a "Protective Earth Terminal." Before operating the equipment, be sure to connect it to the Ground.

- **Perform work in accordance with the instructions herein stated.**
  Instructions for work are explained by paying attention to the aspect of accident prevention. Failing to perform work as per the instructions can cause accidents. In the case where only those who have technical expertise should perform the work to avoid hazardous situation, the instructions herein state that the serviceman should perform such work.

- **Be sure to turn off power before working on the machine.**
  To prevent electric shock, be sure to turn off power before starting the work in which the worker touches the interior of the product. If the work is to be performed in the power-on status, the Instruction Manual herein always states to that effect.

- **Be sure to ground the Earth Terminal** (this, however, is not required in the case where a power cord with earth is used).
  This product is equipped with the Earth Terminal. When installing the product, Connect the Earth Terminal to the "accurately grounded indoor earth terminal" by using an earth wire. Unless the product is grounded appropriately, the user can be subject to electric shock. After performing repair, etc. for the Control equipment, ensure that the Earth Wire is firmly connected to the Control equipment.

- **Ensure that the Power Supply used is equipped with an Earth Leakage Breaker.**
  This product does not incorporate the Earth Leakage Breaker. Using a power supply which is not equipped with the Earth Leakage Breaker can cause a fire when earth leakage occurs.

- **Be sure to use fuses which meet the specified rating.** (only for the machines which use fuses).
  Using fuses exceeding the specified rating can cause a fire and electric shock.
○ Specification changes (removal of equipment, conversion and addition) not
designated by SEGA are not allowed.
The parts of the product include warning labels for safety, covers for personal protection, etc.
It is very hazardous to operate the product by removing parts and or modifying the circuits.
Should doors, lids and protective parts be damaged or lost, refrain from operating the product,
and contact where the product was purchased from or the office herein stated.

○ Ensure that the product meets the requirements of appropriate Electrical
Specifications.
Before installing the product, check for Electrical Specifications. SEGA products have a
nameplate on which Electrical Specifications are described. Ensure that the product is compat-
ible with the power supply voltage and frequency requirements of the location. Using any
Electrical Specifications different from the designated Specifications can cause a fire and
electric shock.

○ Install and operate the product in places where appropriate lighting is avail-
able, allowing warning labels to be clearly read.
To ensure safety for the customers, labels and printed instructions describing potentially
hazardous situation are applied to places where accidents can be caused. Ensure that where
the product is operated has sufficient lighting allowing the warnings to be read. If any label is
peeled off, apply it again immediately. Please place an order with where the product was
purchased from or the office herein stated.

○ When handling the Monitor, be very careful. (Applies only to the product w/
monitor).
Some of the monitor (TV) parts are subject to high tension voltage. Even after turning off
power, some portions are still subject to high tension voltage sometimes. Monitor repair and
replacement should be performed only by those technical personnel who have knowledge of
electricity and technical expertise.

○ When transporting or reselling this product, be sure to attach this manual to
the product.

In the case where commercially available monitors and printers are used in this product,
only the contents relating to this product are explained herein. Some commercially
available equipment has functions and reactions not stated in this manual. Read this
manual together with the specific Instruction Manual of such equipment.

- Descriptions herein contained may be subject to improvement changes without notice.
- The contents described herein are fully prepared with due care. However, should any
question arise or errors be found, please contact SEGA.

**INSPECTIONS IMMEDIATELY AFTER TRANSPORTING THE PRODUCT TO THE LOCATION.**

Normally, at the time of shipment, SEGA products are in a status allowing for usage
immediately after transporting to the location. Nevertheless, an irregular situation may
occur during transportation. Before turning on power, check the following points to
ensure that the product has been transported in a satisfactory status.

- Are there any dented portions or defects (cuts, etc.) on the external surfaces of the
  cabinet?
- Are Casters and Adjusters, damaged?
- Do the power supply voltage and frequency requirements meet with those of the loca-
tion?
- Are all wiring connectors correctly and securely connected? Unless connected in the
correct direction, connector connections can not be made accurately. Do not insert
connectors forcibly.
- Do power cords have cuts and dents?
- Do the fuses used meet specified rating? Is the Circuit Protector in an energized status?
- Are all accessories available?
- Can all Doors and Lids be opened with the Accessory keys? Can Doors and Lids be
  firmly closed?
# TABLE OF CONTENTS

Before using the product, be sure to read the following:

**INTRODUCTION OF THE OWNER'S MANUAL**

SEGA ENTERPRISES, LTD., supported by its high electronic technology of LSIs, microprocessors, etc. and a wealth of experience, has for more than 30 years been supplying various innovative and popular game machines to the world market. This Owner's Manual is intended to provide detailed descriptions together with all the necessary information covering the general operation of electronic assemblies, electromechanicals, servicing control, spare parts, etc. as regards THE LOST WORLD U/R TYPE, a new SEGA product.

This manual is intended for those who have knowledge of electricity and technical expertise especially in ICs, CRTs, microprocessors, etc. Carefully read this manual to acquire sufficient knowledge before working on the machine. Should there be a malfunction, non-technical personnel should under no circumstances touch the interior system. Should such a case arise, contact our Main Office or the closest branch office listed as follows:

SEGA ENTERPRISES, INC. (U.S.A.)/CUSTOMER SERVICE
45133 Industrial Drive, Fremont, California 94538, U.S.A.
Phone : (415) 802-3100
Fax : (415) 802-1754
**DEFINITION OF LOCATION MAINTENANCE MAN AND SERVICEMAN**

**WARNING!**
Non-technical personnel who do not have technical knowledge and expertise should refrain from performing such work that this manual requires the location’s maintenance man or a serviceman to carry out, or work which is not explained in this manual. Failing to comply with this instruction can cause a severe accident such as electric shock.

Ensure that parts replacement, servicing & inspections, and troubleshooting are performed by the location’s maintenance man or the serviceman. It is instructed herein that particularly hazardous work should be performed by the serviceman who has technical expertise and knowledge.

The location’s maintenance man and serviceman are herein defined as follows:

"**Location's Maintenance Man**":
Those who have experience in the maintenance of amusement equipment and vending machines, etc., and also participate in the servicing and control of the equipment through such routine work as equipment assembly and installation, servicing and inspections, replacement of units and consumables, etc. within the Amusement Facilities and or locations under the management of the Owner and Owner's Operators of the product.

**Activities of Location’s Maintenance Man**:
Assembly & installation, servicing & inspections, and replacement of units & consumables as regards amusement equipment, vending machines, etc.

**Serviceman**:
Those who participate in the designing, manufacturing, inspections and maintenance service of the equipment at an amusement equipment manufacturer.
Those who have technical expertise equivalent to that of technical high school graduates as regards electricity, electronics and or mechanical engineering, and daily take part in the servicing & control and repair of amusement equipment.

**Serviceman's Activities**:
Assembly & installation and repair & adjustments of electrical, electronic and mechanical parts of amusement equipment and vending machines.
1. HANDLING PRECAUTIONS

When installing or inspecting the machine, be very careful of the following points and pay attention to ensure that the player can enjoy the game safely.

Non-compliance with the following points or inappropriate handling running counter to the cautionary matters herein stated can cause personal injury or damage to the machine.

**WARNING!**

- Before performing the work, be sure to turn power off. Performing the work without turning power off can cause an electric shock or short circuit.
- To avoid electric shock or short circuit, do not insert or pull out the plug quickly.
- To avoid electric shock, do not unplug with a wet hand.
- Do not expose Power Cords and Earth Wires on the surface, (floor, passage, etc.). If exposed, the Power Cords and Earth Wires are susceptible to damage. Damaged cords and wires can cause electric shock and short circuit accidents.
- To avoid causing a fire or electric shock, do not put things on or damage Power Cords.
- When or after installing the product, do not unnecessarily pull the power cord. If damaged, the power cord can cause a fire or electric shock.
- In case the power cord is damaged, ask for replacement through where the product was purchased from or the office herein stated. Using the cord as is damaged can cause fire, electric shock or leakage.
- Be sure to perform grounding appropriately. Inappropriate grounding can cause an electric shock.
- Be sure to use fuses meeting specified rating. Using fuses exceeding the specified rating can cause a fire or electric shock.
- The electronic parts on the IC Board could be damaged due to human body's static electricity. Before performing IC Board related work, be sure to discharge physically accumulated statics by touching grounded metallic surfaces.
- To avoid causing a fire or electric shock, do not make Specification changes by removing, converting and making additions unless otherwise designated by SEGA.
- Be sure to perform periodic maintenance inspections herein stated.

**IMPORTANT!**

- For the IC board circuit inspections, only the logic tester is allowed. The use of a multiple-purpose tester is not permitted, so be careful in this regard.
- When cleaning the CRT surfaces, use a soft, dry cloth. Do not apply chemicals such as thinner, benzine, etc.
- The electronic parts on the IC Board could be damaged due to human body's static electricity. Before performing IC Board related work, be sure to discharge physically accumulated statics by touching grounded metallic surfaces.
CONCERNING THE STICKER DISPLAY

SEGA product has Stickers describing the product manufacture No. (Serial No.) and Electrical Specifications. Also it has a Sticker describing where to contact for repair and for purchasing parts. When inquiring about or asking for repair, mention the Serial No. and Name of Machine indicated on the Sticker. The Serial No. indicates the product register. Identical machines could have different parts depending on the date of production. Also, improvements and modifications might have been made after the publication of this Manual. In order to meet the above situations, mention the Serial No. when contacting the applicable places.

CONCERNING WARNING DISPLAYS

SEGA product has warning displays on Stickers, Labels and or printed instructions adhered / attached to or incorporated in the places where a potentially hazardous situation can arise. The warning displays are intended for avoiding hazardous situation relating to maintenance and servicing work, and for the prevention of accidents for the customers. There are some portions in the Cabinet, which are subject to high tension voltage, etc. where accidents can be caused only by touching. When performing the servicing work, be very careful of the warning displays. Especially, repair and replacement work not mentioned herein, should be performed by those technical personnel who have knowledge of electricity and technical expertise. For the prevention of accidents, caution any customer whose act runs counter to the warnings, as to the effect that he must stop the act.
2. PRECAUTIONS CONCERNING INSTALLATION LOCATION

WARNING!

This product is an indoor game machine. Do not install it outside. Even indoors, avoid installing in places mentioned below so as not to cause a fire, electric shock, injury and or malfunctioning.

- Places subject to rain or water leakage, or places subject to high humidity in the proximity of an indoor swimming pool and or shower, etc.
- Places subject to direct sunlight, or places subject to high temperatures in the proximity of heating units, etc.
- Places filled with inflammable gas or vicinity of highly inflammable/volatile chemicals or hazardous matter.
- Dusty places.
- Sloped surfaces
- Places subject to any type of violent impact.
- Vicinity of anti-disaster facilities such as fire exits and fire extinguishers.
- The operating (ambient) temperature range is from 5°C to 40°C. Only in the case a projector is employed, the temperature range is from 5°C to 30°C.

LIMITATIONS OF USAGE REQUIREMENTS

WARNING!

- Be sure to check the Electrical Specifications. Ensure that this product is compatible with the location's power supply, voltage and frequency requirements. A plate describing Electrical Specifications is attached to the product. Non-compliance with the Electric Specifications can cause a fire and electric shock.
- This product requires the Breaker and Earth Mechanisms as part of the location facilities. Using them in a manner not independent can cause a fire and electric shock.
- Ensure that the indoor wiring for the power supply is rated at 7A or higher (AC 100V~120V area) and 3A or higher (AC 220~240V area). Non-compliance with the Electrical Specifications can cause a fire and electric shock.
- Be sure to independently use the power supply equipped with the Earth Leakage Breaker. Using a power supply without the Earth Leakage Breaker can cause an outbreak of fire when earth leakage occurs.
- Putting many loads on one electrical outlet can cause generation of heat and a fire resulting from overload.
- When using an extension cord, ensure that the cord is rated at 7A or higher (AC 100~120V area) and 3A or higher (AC 220~240V area). Using a cord rated lower than the specified rating can cause a fire and electric shock.
- Note that for transporting the machine into the location's building, the minimum necessary dimensions of the opening (of doors, etc.) are 0.9m (W) and 2.0m(H).
- For the operation of this machine, secure a minimum area of 1.3m (W) x 1.6m (D). For ventilation, provide an approximately 10cm. space between the rear part of the cabinet and the wall.
3. PRECAUTIONS TO BE HEEDED FOR OPERATION

For the safe operation of the product, be sure to comply with the following precautions.

BEFORE STARTING OPERATION

In order to avoid accidents, check the following before starting the operation:

- Check if all of the adjusters are in contact with the surface. If they are not, the Cabinet can move and cause an accident.

Ensure that all of the Adjusters are in contact with the floor.

- Do not put any heavy item on this product. Placing any heavy item on the product can cause a falling down accident or parts damage.
- Do not climb on the product. Climbing on the product can cause falling down accidents. To check the top portion of the product, use a step.
- To avoid electric shock accidents, check to see if door & cover parts are damaged or omitted.
- To avoid electric shock, short circuit and or parts damage, do not put the following items on or in the periphery of the product.
  Flower vases, flower pots, cups, water tanks, cosmetics, and receptacles/containers/vessels containing chemicals and water.

To avoid injury, be sure to provide sufficient space by considering the potentially crowded situation at the installation location. Insufficient installation space can cause the player to come into contact with or hit the others and result in injury or trouble.
PAYING ATTENTION TO CUSTOMERS

To avoid injury and trouble, be sure to constantly give careful attention to the behavior and manner of the visitors and players.

WARNING!

- To avoid electric shock and short circuit accidents, do not allow customers to put hands and fingers or extraneous matter in the openings of the product or small openings in or around the doors.
- To avoid falling down and injury resulting from falling down, immediately stop the customer’s leaning against or climbing on the product, etc.
- To avoid electric shock and short circuit accidents, do not allow the customers to unplug the power plug without a justifiable reason.
- To avoid injury resulting from falling down, and electric shock accidents due to spilled drinks, instruct the player not to place heavy items or drinks on the product.

CAUTION!

Immediately stop such violent acts as hitting and kicking the product. Such violent acts can cause parts damage or falling down, resulting in injury due to fragments and falling down.

HOW TO USE THE CARTON BOX

STOP

IMPORTANT!

- When asking for the replacement or repair of the product's Game Board (MODEL 3 BOARD), be sure to put the Game Board together with the Shield Case in the Carton Box. Otherwise, the request is not acceptable.
- Put the Shield Case in the Carton Box by paying attention to the correct direction as per the following instructions and as shown by the instructions printed on the Carton Box. Handling in an erroneous manner can damage the Game Board.

Wrap the Shield Case with the packing material and put it in the Carton Box as shown. Putting it upside down or packing otherwise in the manner not shown can damage the Game Board and parts.
6. ASSEMBLING AND PRECAUTIONS

- Perform the assembly work by following the procedure herein stated. Failing to comply with the instructions can cause an electric shock accident.
- Assembling should be performed as per this manual. Since this is a complex machine, erroneous assembling can damage the machine or cause the machine not to function as per specified performance.
- When assembling, be sure to perform the work by plural persons. Depending on the assembly work, there are some cases in which performing the work by a single person can cause personal injury or parts damage.
- Ensure that connectors are accurately connected. Incomplete connections can cause electric shock and short circuit accidents.

The installation and assembling work of this product is performed sequentially in order of the following 4 items:

1. INSTALLING THE BILLBOARD PLATE AND POP PANEL.
2. SECURING TO THE INSTALLATION LOCATION (ADJUSTER ADJUSTMENT)
3. POWER SUPPLY, AND EARTH CONNECTION
4. ASSEMBLING CHECK

Note that the tools such as a Phillips type screwdriver and wrench for hexagon bolt with 24 mm width across flats are necessary for the assembly work.

Phillips type screwdriver

ADJUSTABLE WRENCH (for M16 hexagon bolt)
To perform work safely and securely, be sure to prepare a step which is in a secure and stable condition. Using an unstable step can cause a violent falling down accidents.

1. Take out the 3 Truss screws from the lower part of the Billboard and pull out the Billboard Case towards you.

2. Adhere the Pop Panel to the Billboard Case with 2-sided adhesive tape.

3. Return the Billboard Case to the original position and secure with the 3 truss screws.

4. Take out the 4 truss screws to remove Lamp Cover B.

5. Insert the Billboard Plate to the Billboard Case and secure Lamp Cover B with the 4 truss screws.

Prepare a step to perform work.
Make sure that all of the adjusters are in contact with the floor. If they are not, the cabinet may move causing an accident.

This machine has 4 casters and 4 adjusters (FIG. 6.2 a). When the installation position is determined, cause the leg adjusters to come into contact with the floor directly, make adjustments in a manner so that the casters will be raised approximately 5mm. from the floor and make sure that the machine position is level.

① Move the machine to the installation position.

② Have all of the Adjusters make contact with the floor surfaces. Adjust the height of the Adjusters by using a wrench in the manner so that the machine position is kept level.

③ After making adjustments, fasten the adjuster nut upward and secure the height of the adjuster.

FIG. 6.2 a  BOTTOM VIEW

FIG. 6.2 b

FIG. 6.2 c
Refer to this Fig. (Scale:1/100) for the layout of the place of installation.

FIG. 6.2 d
Provide sufficient space so as to allow for ventilation by the ventilation fan.
3 POWER SUPPLY, AND EARTH CONNECTION

WARNING!

- Be sure to independently use the power supply socket outlet equipped with an Earth Leakage Breaker. Using a power supply without an Earth Leakage Breaker can cause a fire when the leakage occurs.
- Ensure that the "accurately grounded indoor earth terminal" and the earth wire cable are available (except in the case where a power cord plug with earth is used). This product is equipped with the earth terminal. Connect the earth terminal and the indoor earth terminal with the prepared cable. If the grounding work is not performed appropriately, customers can be subjected to an electric shock, and the product's functioning may not be stable.
- Ensure that the power cord and earth wire are not exposed on the surface (passage, etc.). If exposed, they can be caught and are susceptible to damage. If damaged, the cord and wire can cause an electric shock and short circuit accidents. Ensure that the wiring position is not in the customer's passage way or the wiring has protective covering.

The AC unit is mounted on the rear of Cabinet. The AC Unit incorporates the Main SW, Circuit Protector, Earth Terminal and Inlet which connects the Power Cord. Firmly insert the Power Plug into the Plug Socket and the other side of the plug to the Inlet. Turn the Main SW ON to turn power ON.

1. Ensure that the Main SW is OFF.

   ![Diagram of main switch turned off]

   Turn the Main SW OFF.

2. Connect one end of the earth wire to the AC Unit earth terminal, and the other end to the indoor earth terminal. The AC Unit earth terminal has a Bolt and Nut combination. Take off the Nut, pass the earth wire through the Bolt, and fasten the Nut.

   ![Diagram of earth wire connection]

   FIG. 6. 3 a

   FIG. 6. 3 b
3. Firmly insert the power plug into the plug socket and inlet.

5. Turn the Main SW ON to turn power ON.
ASSEMBLING CHECK

In the TEST MODE, ensure that the assembly has been made correctly and IC BD is satisfactory (refer to Section 9).

In the test mode, perform the following test:

MEMORY TEST

| IC 1 GOOD | IC 2 GOOD | IC 3 GOOD | IC 4 GOOD | IC 5 GOOD | IC 6 GOOD | IC 7 GOOD | IC 8 GOOD | IC 9 GOOD | IC10 GOOD | IC11 GOOD | IC12 GOOD | IC13 GOOD | IC14 GOOD | IC15 GOOD | IC16 GOOD | IC17 GOOD | IC18 GOOD | IC19 GOOD | IC20 GOOD |
|-----------|-----------|-----------|-----------|-----------|-----------|-----------|-----------|-----------|-----------|-----------|-----------|-----------|-----------|-----------|-----------|-----------|-----------|-----------|-----------|-----------|

PRESS TEST BUTTON TO EXIT

Selecting the MEMORY TEST on the test mode menu screen causes the on-board memory to be tested automatically. The game board is satisfactory if the display beside each IC No. shows GOOD.

INPUT TEST

| TRIGGER | off | off |
| START   | off | off |
| COIN CHUTE #1 | off | off |
| COIN CHUTE #2 | off | off |
| SERVICE | off | off |
| TEST    | off | off |

PRESS TEST BUTTON TO EXIT

Selecting the INPUT TEST on the test mode menu screen causes the screen (on which each switch is tested) to be displayed. Press each switch. For the coin switch test, insert a coin from the coin inlet with the coin chute door being open. If the display beside each switch indicates "ON," the switch and wiring connections are satisfactory.

SOUND TEST

| VOICE |
| R.G.M. |
| > EXIT |

SELECT WITH SERVICE BUTTON AND PRESS TEST BUTTON

In the TEST mode, selecting SOUND TEST causes the screen, on which sound related BD and wiring connections are tested, to be displayed. Be sure to check if the sound is satisfactorily emitted from each speaker and the sound volume is appropriate.
In the TEST mode menu, selecting C.R.T. TEST allows the screen (on which the monitor is tested) to be displayed. Although the monitor adjustments have been made at the time of shipment from the factory, color deviation, etc., may occur due to the effect caused by geomagnetism, the location building's steel frames and other game machines in the periphery. By watching the test mode screen, make judgment as to whether an adjustment is needed. If it is necessary, adjust the monitor by referring to Section 12. In case of color deviation due to the monitor's magnetization, use DEMAG SW (see Section 9).

On the menu screen in the test mode, selecting GUN SETTING displays the screen on which gun sighting is set. Check to see if there is any problem for playing game.

Select "OUTPUT TEST" from the Test Menu in the Test Mode to have the Lamp Test Screen displayed. Check if each lamp lights up satisfactorily.

Perform the above inspections also at the time of monthly inspection.
7. PRECAUTIONS TO BE HEEDED WHEN MOVING THE MACHINE

- When moving the machine, be sure to pull out the plug from the power supply. Moving the machine with the plug as is inserted can damage the power cord and cause a fire or electric shock.
- When moving the machine on the floor, retract the Adjusters and ensure that Casters make contact with the floor. During transportation, pay careful attention so that Casters do not tread power cords and earth wires. Damaging the power cords can cause electric shock and short circuit accidents.

- When moving the product, do not push the Front Glass. The Glass part could be damaged and glass fractions can cause injury.
- When lifting the cabinet, be sure to hold the grip portions or bottom part. Lifting the cabinet by holding other portions can damage parts and installation portions due to the empty weight of the cabinet, and cause personal injury.

Have the Casters make contact with the floor.

FIG. 7
8. CONTENTS OF GAME

The following are operations and responses obtained when the machine functions satisfactorily. Any functioning different from the following may have been caused by a certain fault. Immediately investigate and eliminate the cause of malfunctioning to ensure satisfactory operation.

1. Inserting a coin(s) causes the credit display on the bottom of the screen to count. Inserting one credit worth coin(s) changes the message on the bottom of the screen from "INSERT COIN(S)" to "PRESS START BUTTON" and both of the start buttons will flash. The maximum number of credits counted at a time is 9. Any coin inserted after counting 9 credits will not be counted as any credits, nor be returnable. These coins, however, will count as coins inserted in bookkeeping and the coin meter.

2. Pressing either of the start buttons determines which side (left or right) you are playing on. Press the START button to start the game.

3. After starting the game, the Title of the Stage being started is displayed.

- The life points and the number of bullets of the left-hand side player (1P) are displayed on the lower left-hand side of the screen, and those of the right-hand side player (2P), on the lower right-hand side of the screen.

- You lose one life when the dinosaur attacks you.

- Shooting a human by mistake loses one life.

Shooting a human by mistake loses one life.
The gun holds 5 bullets. When it runs out of ammo, "RELOAD" is displayed on the screen. At this time, point outside the screen and pull the trigger to reload.

When the life point becomes zero, the game is over.

Downing the boss character awaiting you at the end of each stage results in clearing that particular stage. The player can not defeat the boss until the life meter of the boss becomes zero.

Shooting an item on the screen or clearing a specific event allows you to capture an item. Capturing an item strengthens weapons or recovers the life (the explanations regarding the items are stated later on).

Downing the boss character awaiting you at the end of each stage results in clearing that particular stage. The player can not defeat the boss until the life meter of the boss becomes zero.

The Sight Mark sometimes appears on the enemy. At this time, unless the enemy is downed before the sight turns red, the player’s life may be lost or the player’s status could be extremely unfavorable.

Unless the enemy is downed before the sight turns red, the player’s status could be extremely unfavorable.
• When fighting against the boss character at the end of each stage in the 2 player simultaneous play, if all of the sights can not be shot, the screen will be in the objective mode and in this case either of the players may be taken away by the enemy.

  • The player who is taken away will remain on the screen as is between the dinosaur’s teeth. Herein, he is referred to as Player A.

  • The other player who is not taken away stays on the screen in the subjective mode. Herein, this player is referred to as Player B.

• At this time, Player B who is not taken away can rescue Player A by shooting all of the sights before the sight attached to the boss turns red.

• Although Player A can not shoot with the gun, he can extend the completion time of the sight attached to the boss by repeatedly pressing the Start Button.

• If Player B fails to shoot all of the sights before the boss sight becoming red, then Player A will be subject to damage and Player A loses one life.
④ If you would like to join in the game at anytime while the other person is playing, insert a coin(s) and press the start button. Also, when credits allowing the game to be played still remain, the start button on the other side will keep flashing. The player can participate in the game by pressing the flashing button.

⑤ When the life point becomes zero, if you want to continue, insert a coin(s) required to continue and press the start button. If credits allowing the player to continue still remain, you can continue by merely pressing the start button.

⑥ At the time of game over, if the player's score ranks 10th or higher, his name can be entered.

**KNACK OF PLAY**

**TO SHOOT AND DESTROY WHAT EMITS SOUND.**

In any stage, the enemy characters other than the boss character will face in the direction where sound is emitted in response to sound and during this time, they stop attacking temporarily. When you are surrounded by plural enemies, shoot anything that emits sound to divert the enemy's attention. Things that emit sound are glass, metal, wooden items, etc.

![Quick Shot](image)

Shooting the sound emitting items (glass, metals, etc.) causes the dinosaur to respond to the sound produced and the alarm sound emitted by the fellow dinosaur whose head is shot, and thus the enemy temporarily stops attacking.

- Accurately shoot the head:
  In each stage, the head part is the weak point of the enemy characters other than the boss. Shooting the head produces a very loud alarm sound which results in the same effect as when shooting what emits sound.

- Successfully perform an event:
  Successfully achieving an event which takes place during a stage allows you to favorably proceed with what's coming thereafter. On the other hand, failing to achieve the event causes the enemy attack to become more furious and the situation for the player to be less favorable.

- Continuously hitting the target enemy without missing earns you high points.
S-POWERBAR (SPECIAL POWER BAR)
This increases your "LIFE" by one.

POWERBAR
Collecting 3 POWERBARs increases your "LIFE" by one.

GRENADE
Hitting this against the earth surface damages the target(s) over a wide area.
During the limited time, there is no limit regarding the number of grenades that can be used. When the limited time elapses, this returns to an ordinary gun.

SHOT GUN
Having a wide scope for hit determination, this damages the target(s) in an extensive area.
During the limited time, there is no limit regarding the number of bullets that can be used. When the limited time elapses, this returns to an ordinary gun.

LIGHTNING
Hitting a target damages targets within a certain scope from that particular point.
During the limited time, there is no limit regarding the number of bullets that can be used. When the limited time elapses, this returns to an ordinary gun.

LASER-SITE
The present place at the gunpoint appears on the screen in real time as the pointer.
During the limited time, there is no limit regarding the number of bullets that can be used. When the limited time elapses, this returns to an ordinary gun.
**VELOCIRAPTOR**

Alias: RAPTOR  
Weight: 45 kg  Length: 2m  Flesh-eater  
One of the most ferocious dinosaur in The Lost World. Captures prey by taking an advantage of sharp, long & hook-shaped claws and agile movements as powerful weapons. This dinosaur seems to have brains and skills to pursue spoils in groups.  
Appearance in all stages.

**MAMENCHISAURUS**

Weight: 12t  Length: 22m  Plant-eater  
MAMENCHISAURUS was a living creature with an approximately 11m long head & neck portion, about the half of the total length, the longest ever (in relation to the physical length) in the terrestrial history. Since the head movements were not so versatile, it might have been able to stand on its rear feet alone sometimes to make up for the handicap.  
Appearance in Stage 2.

**TRICERATOPS**

Weight: 6t  Length: 9m  Plant-eater  
This plant-eater has features of 3 large horns which derive its name and an accessory-like pattern around the neck portion. It’s a gentle dinosaur which eats young buds, etc. with the edge-sharp beak.  
Appearance in Stage 1.

**TYRANNOSAURUS-REX**

Alias: TYREX  
Weight: 6.5t  Length: 12m  Flesh-eater  
This flesh-eating dinosaur is well-known and the strongest one ever existed in the history. Although physically gigantic, it seems that this dinosaur was able to run fairly quick to pursue prey. The sharp biting attack ability with teeth of a 17 cm. length could be the maximum threat.  
Appearance in Stage 1 & ?
GALLIMIMUS
Weight: 130 kg  Length: 4m  Omnivorous-eater
This dinosaur running in groups in the "Jurassic Park" is very impressive. It has the skeletal structure quite similar to an ostrich and its movements are the fastest of all dinosaurs. Having omnivorous-eating habits, it takes insects, small lizards, and fruit.
Appearance in Stage 2.

STEGOSAURUS
Weight: 1.5t  Length: 6m  Plant-eater
A large body and small head as well as the spine are very characteristic. It seems that the 2 pairs of tail spines are utilized for defense, and also, they always act in groups.
Appearance in Stage 1.

DILOPHOSAURUS
Alias: Spitter
Weight: 1t  Length: 6m  Flesh-eater
This dinosaur suddenly became famous as poison spitter in the Jurassic Park. It is distinguished by the large muffler that spreads out to threaten others.
Appearance in Stage 1.

PACHYCEPHALOSAURUS
Alias: PACHY
Weight: ?  Length: 4.5m  Plant-eater
Having the head of a dome-shaped skeletal structure, this dinosaur looks strange as if it had a helmet on. The "helmet" portion is as thick as 25 cm. and surrounded by spike-shaped spines. Did it ferociously fight against the enemies and its rivals sometimes with head butts attack by taking advantage of the rock head?
Appearance in Stage 2.
PARASAUROLOPHUS
Weight: ?   Length: 10m   Plant-eater
The length of the cristated, cylindrical portion of the head is approximately one meter. The cristate is considered to produce cry resonance and to be useful for communicating with fellow dinosaurs belonging to their groups and also instrumental in making amorous approaches.
Appearance in Stage 2.

ANATOSAURUS
Weight: 3t   Length: 10m   Plant-eater
This belongs to one of the duck-billed dinosaur species, the same as PARASAUROLOPHUS. Its characteristic is the duck-billed wide beak. A number of back teeth allows it to eat hard things such as pine needles and nuts.
Appearance in Stage 2.

PROCOMPSONOGRATUS
Alias: COMPY
Weight: 3 kg   Length: 60 cm   Flesh-eater
This is one of the smallest dinosaurs, only as large as a chicken. It can move quickly and catches small animals such as lizards, etc., and sometimes attacks human adults by groups!!
Appearance in Stages 1, 3, and 5.

DEINOSUCHUS
Weight: ?   Length: 15m   Flesh-eater
The name is derived from “fearful Alligator.” Although belonging to the specie different from the dinosaur, this is a ferocious flesh-eater which attacks living creatures and fish at the waterside. The length is said to be 15m though the appearance is almost the same as currently existing alligators. Its weapons are the jaws lined up with sharp teeth and the strong tail.
Appearance in Stage 2.
PTERANODON

Weight: 17 kg. Length: 7m (when wings are opened)  Flesh-eater

PTERANODON signifies that it has wings and is toothless. It used to glide through the air like a glider with large wings spread out. Freely flying through the sky, it pursues spoils from above with its sharp beak.

Appearance in Stage 4.

CARNOTAURUS

Weight: ?  Length: 12m  Flesh-eater

The characteristics are a short, strange looks with two large spines. In the “Lost World,” the original novel, this is given a setting as Chameleon Dinosaur and captures preys which come near by without knowing that this dinosaur uses the technique in which it camouflages itself by changing its physical color adapted to the surrounding scenery.

Appearance in Stage 4.
9. EXPLANATION OF TEST AND DATA DISPLAY

By operating the switch unit, periodically perform the tests and data check. When installing the machine initially or collecting cash, or when the machine does not function correctly, perform checking in accordance with the explanations given in this section. The following shows tests and modes that should be utilized as applicable.

<table>
<thead>
<tr>
<th>ITEMS</th>
<th>DESCRIPTION</th>
<th>REFERENCE SECTIONS</th>

SWITCH UNIT AND COIN METER

WARNING!

Never touch places other than those specified. Touching places not specified can cause electric shock and short circuit.

STOP

IMPORTANT!

- Adjust to the optimum sound volume by considering the environmental requirements of the installation location.
- If the COIN METER and the game board are electrically disconnected, game play is not possible.

Open FRONT DOOR (RIGHT), and the Switch Unit shown appears. The function of each switch is as follows:

TEST BUTTON (TEST SW) : For the handling of the TEST BUTTON, refer to the following pages.
SERVICE BUTTON (SERVICE SW) : Gives credits without registering on the coin meter.
SPEAKER VOLUME (VOLUME) : Adjusts the volume of all of the Speakers.
DEMAGNETIZER SWITCH : Eliminates the unevenness of MONITOR's on-screen color.

Open the Cashbox Door by using the key to have the Coin Meter appear underneath the Cashbox.
9—2 TEST MODE

**STOP IMPORTANT!**

In case settings are changed in GAME ASSIGNMENTS, COIN ASSIGNMENTS, and GUN SETTING, the setting changes are not effective unless the test mode is exited and the game mode returns on the screen. The setting changes are ineffective if power is turned off in the test mode.

This mainly checks if the operation of the game BD is accurate, and allows for COIN ASSIGNMENTS/GAME ASSIGNMENTS setting and Monitor adjustments.

### SELECTION OF TEST ITEMS

**TEST MENU**

- MEMORY TEST
- INPUT TEST
- SOUND TEST
- C.R.T. TEST
- GAME ASSIGNMENTS
- COIN ASSIGNMENTS
- GUN SETTING
- OUTPUT TEST
- BOOKKEEPING
- BACKUP DATA CLEAR
- > EXIT

SELECT WITH SERVICE BUTTON
AND PRESS TEST BUTTON

1. Push the TEST BUTTON to cause the following TEST MENU to appear:

2. By pushing the SERVICE BUTTON, bring the arrow mark " > " to the desired item and press the TEST BUTTON.

3. After the test is complete, move " > " to "EXIT" and press the TEST BUTTON to return to the Game Mode.

---

9—3 MEMORY TEST

**MEMORY TEST**

*Row*

| IC 1 | GOOD | IC 2 | GOOD | IC 3 | GOOD | IC 4 | GOOD |
| IC 5 | GOOD | IC 6 | GOOD | IC 7 | GOOD | IC 8 | GOOD |
| IC 9 | GOOD | IC10 | GOOD | IC11 | GOOD | IC12 | GOOD |
| IC13 | GOOD | IC14 | GOOD | IC15 | GOOD | IC16 | GOOD |
| IC17 | GOOD | IC18 | GOOD | IC19 | GOOD | IC20 | GOOD |

*Row*

| IC 17 | GOOD | IC18 | GOOD | IC 94 | GOOD |

PRESS TEST BUTTON TO EXIT

The MEMORY TEST mode is for checking the on-BD memory IC functioning.
"GOOD" is displayed for normal ICs and "BAD" is displayed for abnormal ICs.

- When the test is completed, if the display is as shown left, it is satisfactory.
- After finishing the test, pressing the TEST BUTTON allows the MENU mode to return on to the screen.
9—4 INPUT TEST

When INPUT TEST is selected, the monitor will show the following, allowing you to watch the status of each switch.
On this screen, periodically check the status of each switch.

<table>
<thead>
<tr>
<th>INPUT TEST</th>
<th>PLAYER 1</th>
<th>PLAYER 2</th>
</tr>
</thead>
<tbody>
<tr>
<td>TRIGGER</td>
<td>off</td>
<td>off</td>

<tr>
<td>SERVICE</td>
<td>off</td>
<td></td>
</tr>
<tr>
<td>TEST</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

PRESS TEST BUTTON TO EXIT

- By pressing each switch, if the display on the right-hand side of the name of each switch changes to on from off, the SW and the wiring connections are satisfactory.
- Open the Coin Chute Door and insert a coin into the Coin Entry to check Coin Chute Coin SW. Note that depending on the destination, this product may not be equipped with COIN CHUTE #2.

Press the Test button to return to the Test Menu mode (FIG. 9.2).

9—5 SOUND TEST

This enables sounds used in the game to be checked. Sound related memory and each speaker are checked.

By using the Service button, bring the arrow to select the desired sound item to be checked. Each time the Test button is pressed, the numeral beside the selected item increases by one and the sound is emitted sequentially in order.

Choose EXIT and press the Test button to return to the menu mode (FIG. 9.2).
Select C. R. T. Test to cause the Monitor to display the screen shown left, allowing Monitor adjustment status to be checked.

Periodically check the Monitor adjustment status on this screen.

The screen (1/2) enables color adjustment check to be performed. The color bar of each of the 4 colors, i.e., red, green, blue and white, is darkest at the extreme left and becomes brighter towards the extreme right.

Press the TEST BUTTON to shift to the next page (2/2).

The screen (2/2) allows screen size and distortion to be tested.

Check if the Crosshatch Frame Line goes out of the screen and if the crosshatch lines are distorted.

Press the TEST BUTTON to return to the Menu mode. (FIG. 9. 2)
9-7  GAME ASSIGNMENTS

Selecting the GAME ASSIGNMENTS in the menu mode causes the present game setting to be displayed and also the game setting changes (game difficulty, etc.) can be made. Each item displays the following content.

SETTING CHANGE PROCEDURE

The setting changes are ineffective unless "EXIT" is selected in the menu mode (FIG. 9. 2). Be sure to exit from the test mode after the setting change.

① Press the SERVICE BUTTON to move the arrow " > " to the desired item.
② Choose the desired setting change item by using the TEST BUTTON.
③ To return to the MENU mode, move the arrow to EXIT and press the TEST BUTTON.

GAME ASSIGNMENTS

GAME DIFFICULTY
Game Difficulty can be set in 16 different levels.

ADVERTISE SOUND
Determines whether ADVERTISE SOUND is to be emitted or not by setting to ON when emitting it and to OFF when not emitting it.

LIFE
The INITIAL LIFE (the number of life points allotted to the player at the time of game start) can be selected from the 9 categories.

BOSS ACTION
The setting of the last Boss Character is performed.
NORMAL enables LIFE recovery.
MILD disables LIFE recovery.

FIG. 9. 7  GAME ASSIGNMENTS
COIN ASSIGNMENTS

The "COIN ASSIGNMENTS" mode permits you to set the start number of credits, as well as the basic numbers of coins and credits. This mode expresses "how many coins correspond to how many credits."

SETTING CHANGE PROCEDURE

The setting changes are ineffective unless "EXIT" is selected in the menu mode (FIG. 9. 2). Be sure to exit from the test mode after the setting change.

FIG. 9. 8 a  COIN ASSIGNMENTS

- CREDIT TO START / CREDIT TO CONTINUE
  Number of credits required for starting game and for continuing game are set. The eleven sets of these combinations are available as follows:

  START :  1  2  3  3  4  4  4  5  5  5  5
  CONTINUE : 1  1  1  2  1  2  3  1  2  3  4

- COIN/CREDIT SETTING
  Sets the CREDIT increase increment per coin insertion. There are 27 settings from #1 to #27, expressed in ○COIN CREDIT as against ○COINS inserted. #27 refers to FREE PLAY (refer to TABLE 9. 8 a).

- MANUAL SETTING
  This allows credit increase setting as against coin insertion to be further set in the manner finer than COIN/CREDIT SETTING (refer to TABLE 9. 8 b).
HOW TO USE THE TEST MODE

Selecting MANUAL SETTING in the Coin Assignment mode displays the following screen.

FIG. 9.8b  MANUAL SETTING

1. Determines Coin /Credit setting.
2. This sets how many coins should be inserted to obtain one Service Coin.
3. This sets how many tokens one coin represents.

STOP

IMPORTANT!

The setting changes are ineffective unless "EXIT" is selected in the menu mode (FIG. 9.2). Be sure to exit from the test mode after the setting change.

Selecting GUN SETTING causes the following screen shown at the top to appear. This allows the controller sighting to be adjusted. Periodically check the sighting adjustment status on this screen.

The screen shown left is the sighting adjustment menu mode. Press the SERVICE button to bring the arrow to the desired adjustment item to check. Press the Test button to have the following adjustment menu mode appear on the screen. Bring the arrow to EXIT and press the TEST button to return to the menu mode (FIG. 9.2).

Selecting GUN MARK CHECK causes the screen at the left to appear (the intersecting point of the 2 straight lines indicates the center of the screen). Point the Controller to this screen to have a square cursor appear (1P side is blue and 2P side is red). This cursor indicates an impact mark. Point the Controller at the screen and trigger to have a small square remain on the screen as impact mark. Perform sighting check on this screen. Press the Test button to return to the above sighting adjustment menu screen.

CURSOR (Impact Position)

CURSOR for 1P is blue and for 2P, red.

FIG. 9.9b SIGHTING CHECK
Select GUN ADJUSTMENT to display the following screen. In this mode, the 4 Adjustment values (for on-screen right end, left end, upper end and lower end) are set. Each adjustment value is set as follows. Be sure to determine the adjustment value by actually pointing the Controller at the end of the designated direction (the cursor value is preset). Select each adjustment position by using the 1P or 2P Start button. Press the Test button to return to the SIGHTING ADJUSTMENT mode.

**FIG. 9.9 c**
**SIGHTING ADJUSTMENT**

The Cursor is in the pre-setting status.

For the actual sighting adjustment, trigger while each end of the on-screen 4 sides being aimed at by the Controller regardless of the Cursor.

**RIGHT aa:bb**
Determine the adjustment value of the screen’s right-hand end in the horizontal directions.
The left side value (aa) indicates the pre-setting value, and the right side value (bb) refers to the value to be newly inputted.
By pointing the Controller to the right end of the screen, determine the adjustment value while actually aiming the Controller at the right end of the screen with the Controller and triggering regardless of the cursor.
At this time, disregard the vertical directions.

**LEFT aa:bb**
Determine the adjustment value of the screen’s left-hand end in the horizontal direction. The left side value (aa) indicates the pre-setting value, and the right side value (bb) refers to the value to be newly inputted.
By pointing the Controller to the left end of the screen, determine the adjustment value while actually aiming the Controller at the left end of the screen and triggering regardless of the cursor.
At this time, disregard the vertical directions.

**TOP aa:bb**
Determines the adjustment value of the screen’s upper end in the vertical direction.
The left side value (aa) indicates the pre-setting value, and the right side value (bb) refers to the value to be newly inputted.
By pointing the Controller to the upper end of the screen, determine the adjustment value while actually aiming the Controller at the upper end of the screen and triggering regardless of the cursor.
At this time, disregard the horizontal directions.

**BOTTOM aa:bb**
Determines the adjustment value of the screen’s lower end in the vertical direction.
The left side value (aa) indicates the pre-setting value, and the right side value (bb) refers to the value to be newly inputted.
By pointing the Controller to the lower end of the screen, determine the adjustment value while actually aiming the Controller at the lower end of the screen and triggering regardless of the cursor.
At this time, disregard the horizontal directions.

**CENTER X aa:bb**
**Y aa:bb**
Determines the adjustment value of the screen’s center.
X and Y respectively indicates left/right and up/down directions. The left-hand side value (aa) indicates the pre-setting value, and the right-hand side value (bb) refers to the value to be newly inputted.
By pointing the Controller to the center of the screen, determine the adjustment value while actually aiming the Controller at the center of the screen and triggering regardless of the cursor.
Choose OUTPUT TEST to have the MONITOR screen shown left appear. This screen allows lamp status to be checked. Periodically check the lamp status in this mode.

Select the desired item to be checked. If each of 1P and 2P buttons flashes, it is satisfactory. Note that though ROOM LIGHT and MARS LIGHT are displayed on the screen, the U/R Cabinet is not equipped with these.

Choose EXIT and press the Test button to return to the Menu mode (FIG. 9. 2).
BOOKKEEPING

Choosing BOOKKEEPING in the menu mode displays the data of operating status up to the present are shown on 2 pages. PAGE 1/2 shows COIN/CREDIT related data. Press the Test button to proceed to PAGE 2/2.

- **COIN CHUTE #1, 2:** Number of coins put in each Coin Chute.
- **TOTAL COINS:** Total number of activations of coin chutes
- **COIN CREDITS:** Number of credits registered by inserting coins
- **SERVICE CREDITS:** Credits registered by the SERVICE BUTTON
- **TOTAL CREDITS:** Total number of credits (COIN CREDITS + SERVICE CREDITS)
- **NUMBER OF GAMES:** Total number of plays
- **TOTAL TIME:** Total energized time
- **AVERAGE PLAY TIME:**
- **LONGEST PLAY TIME:**
- **SHORTEST PLAY TIME:**

On page (2/2), each play frequency is displayed. When setting difficulty levels, the frequency can be referred to as a standard.

When in the PAGE 2/2 mode, press the Test button to return to the Menu mode (FIG. 9.2).
Clears the contents of BOOKKEEPING and high score player ranking entry. When clearing the contents, bring the arrow to "YES" and press the test button. When the data has been cleared, "COMPLETED" is displayed. Press the Test button to return to the menu mode (FIG. 9.2). Bringing the arrow to "NO" and pressing the Test button causes the menu mode to return to the screen. Note that the contents of game assignments and sighting adjustment are not affected by BACKUP DATA CLEAR operation.
10. CONTROLLER (GUN)

**WARNING!**

- In order to prevent an electric shock and short circuit, be sure to turn power off before performing work by touching the interior parts of the product.
- Be careful so as not to damage wirings. Damaged wiring can cause an electric shock or short circuit accident.

In the cases where the controller's operation is not satisfactory or the controller sight deviates from the direction in which the controller is pointed, the controller's interior parts may have been damaged. Replace the parts by disassembling the controller in the following procedure: Also, be sure to perform sighting check in the test mode when the controller parts are replaced.

**REPLACING THE MICROSWITCH**

1. Disassemble the controller.
2. Pull out the microswitch from COVER RIGHT.
3. Take out the microswitch by removing the soldering from it.
4. Bend the new Microswitch Actuator as shown.
5. Solder the new microswitch and assemble the controller.
6. By operating the Trigger, check if the Microswitch can be turned ON/OFF correctly.

**REPLACING THE SENSOR UNIT**

1. Disassemble the controller.
2. Remove the sensor unit from COVER.
FIG. 10

Approximately 7 mm

Approximately 8 mm

MICROSWITCH ACTUATOR BENDING WORK
11. COIN SELECTOR

HANDLING THE COIN JAM

If the coin is not rejected when the REJECT button is pressed, open the coin chute door and open the selector gate. After removing the jammed coin, put a normal coin in and check to see that the selector correctly functions.

CLEANING THE COIN SELECTOR

The coin selector should be cleaned once every 3 months. When cleaning, follow the procedure below:

1. Turn the power for the machine OFF. Open the coin chute door.
2. Open the gate and dust off by using a soft brush (made of wool, etc.).
3. Remove and clean smears by using a soft cloth dipped in water or diluted chemical detergent and then squeezed dry.
4. Remove the CRADLE.
   When removing the retaining ring (E ring), be very careful so as not to bend the shaft.
5. Remove stain from the shaft and pillow portions by wiping off with a soft cloth, etc.
6. After wiping off as per 5 above, further apply a dry cloth, etc. to cause the coin selector to dry completely.

STOP
IMPORTANT!

- Never apply machine oil, etc. to the Coin Selector.
- After cleaning the Coin Selector, insert a regular coin in the normal working status and ensure that the Selector correctly functions.

COIN INSERTION TEST

Once every month, when performing the Coin SW Test, simultaneously check the following:

☐ Does the Coin Meter count satisfactorily?
☐ Does the coin drop into the Cashbox correctly?
☐ Is the coin rejected when inserted while keeping the Reject Button pressed down?
12. MONITOR

12-1 CAUTIONS AND WARNINGS CONCERNING THE SAFETY FOR HANDLING THE MONITORS

Before handling the monitors, be sure to read the following explanations and comply with the caution/warning instructions given below. Note that the caution/warning symbol marks and letters are used in the instructions.

Indicates that handling the monitors erroneously by disregarding this warning may cause a potentially hazardous situation, which could result in death or serious injury.

Indicates that handling the monitors by disregarding this caution may cause a potentially hazardous situation, which could result in personal injury and or material damage.

Indicates the instruction to disconnect a power connector or to unplug.

- When performing such work as installing and removing the monitor, inserting and disconnecting the external connectors to and from monitor interior and the monitor, be sure to disconnect the power connector (plug) before starting the work. Proceeding the work without following this instruction can cause electric shock or malfunctioning.

- Using the monitor by converting it without obtaining a prior permission is not allowed. SEGA shall not be liable for any malfunctioning and accident caused by said conversion.

- Primary side and Secondary side

The monitor’s circuit which is divided into the Primary side and Secondary side, is electrically isolated. Do not touch the primary side, or do not touch both the primary side and the secondary side simultaneously. Failing to observe the instruction can cause electric shock and this is very dangerous. When making monitor adjustments, use a non-conductive driver and make adjustment without touching any part other than the Adjustment V. R. and knob. Also, be sure not to cause a short-circuit to the Primary side and Secondary side. If short-circuited, it can cause electric shock or malfunctioning, which is very dangerous.

- High-tension Voltage

Some of the parts inside monitor are subject to high-tension voltage in excess of 20,000 volts and very dangerous. Therefore, do not touch the monitor interior. Should soldering & paper wastes, etc. be mixed in the monitor interior, turn the power off so as not to cause malfunctioning or fire hazard.

- Connecting the CRT and PCB

For combining the CRT and PCB, use the specified part No. to maintain the status of adjustments made at the factory. The anode of the CRT itself will be accumulatively charged as time elapses, generating high-tension voltage which is very dangerous. The monitor should be used with the Chassis, CRT and PCB assembled. When repair, etc. is required at the time of malfunctioning, be sure to send it in an "as is assembled" condition. If these are disassembled, what’s charged to said high tension voltage can be discharged, causing a very hazardous situation. Therefore, under no circumstances should it be disassembled.

- Static Electricity

Touching the CRT surface sometimes causes you to slightly feel electricity. This is because the CRT surfaces are subject to static and will not adversely affect the human body.

- Installation and removal

Ensure that the Magnetizer Coil, FBT (Fly-Back Transformer), Anode Lead and Focus Lead are not positioned close to the sheet metal work’s sharp edges, etc. and avoid damaging the insulated portions so as not to cause electric shock and malfunctioning. (For the name of parts, refer to the above Figures).
For the purpose of static prevention, special coating is applied to the CRT face of this product. To protect the coating, pay attention to the following points. Damaging the coating film can cause electric shock to the customers. For the caution to be heeded when cleaning, refer to the Section of Periodic Inspection Table.

- Do not apply or rub with a hard item (a rod with pointed edge, pen, etc.) to or on the CRT surfaces.
- Avoid applying stickers, seals, etc. on the CRT face.
- Do not remove aluminum foils from the CRT corners. Removing the aluminum foils can cause static prevention effects to be lowered.

12-2 CLEANING THE CRT

Use care when handling the glass made parts. If glass made parts are damaged, the glass fractions can cause injury.

- When cleaning the CRT, be sure to use a soft, dry cloth. Do not use chemicals such as thinner, benzene, etc.
- Apply anti-static agent, which prevents dust attachment, only to the CRT face.

Be sure to turn power off before cleaning the CRT.

When cleaning the CRT, remove GLASS HOLDER UPPER and the FRONT GLASS.
Monitor adjustments have been made at the time of shipment. Therefore, do not make further adjustment without a justifiable reason. Adjusting the monitor which contains high tension parts is a dangerous work. Also, an erroneous adjustment can cause deviated synchronization and image fault, resulting in malfunctioning.

- When making adjustment, utilize a resinous Alignment Screwdriver. Servicing with bare hand or using conductive tools can cause electric shock accidents.

Remove the back door at the rear of the cabinet, and the monitor adjustment knob appears.

1. Take off the 3 tamperproof screws to remove the back door.

2. There are 3 types of Monitor that can be used for this product. Depending on the specific monitor, the knob layout varies.
□ NANA0 monitor: 2 0 0 - 5 2 4 2 - 2 4 - 0 5 (24K mode)
□ NANA0 monitor: 2 0 0 - 5 3 8 7 - 2 4 - 0 1 (24K mode)

□ SANWA monitor: 2 0 0 - 5 2 4 3 - 2 4 - 0 1 (24K mode)

1 R-GAIN ....
2 G-GAIN .... Controls colors.
3 B-GAIN ....
4 BRIGHT .... Controls screen brightness.
5 H. SIZE .... Controls horizontal screen size.
6 H. HOLD .... Provides horizontal synchronization, i.e., controls right/left hold.
7 H. POSI .... Controls horizontal display position on screen.
8 V. SIZE .... Controls vertical screen size.
9 V. HOLD .... Provides vertical synchronization, i.e., controls up-down hold.
10 V. POSI .... Controls vertical display position on screen.
11 CONTRAST ... Adjusts image contrast.
13. REPLACEMENT OF FLUORESCENT LAMP AND LAMPS

**WARNING!**

- When performing the work, be sure to turn power off. Working with power on can cause electric shock and short circuit accidents.
- The Fluorescent Lamp, when it gets hot, can cause burns. Be very careful when replacing the Fluorescent Lamp.
- Be sure to use the lamp of the specified rating. Using lamps of non-specified rating can cause a fire or malfunctioning.

**CAUTION!**

To perform work safely and securely, be sure to prepare a step which is in a secure and stable condition. Not using a step or using an unstable step can cause a violent falling down accidents.

13-1 REPLACEMENT OF FLUORESCENT LAMP

After removing Lamp Cover B and Billboard Plate as per FIG. 6. 1 a, Section 6, take out the 2 screws, remove Lamp Cover A, and replace the Fluorescent Lamp.

FIG. 13. 1

PREPARE A STEP TO PERFORM WORK.
13-2 LAMP REPLACEMENT

1. Take off the 6 Tamperproof Screws and remove the Switch Panel. (FIG. 13. 2 a)

2. Pull the lower part of the Switch from the rear of the Switch Panel and remove the Switch part to replace the lamp. (FIG. 13. 2 b)
14. PERIODIC INSPECTION TABLE

The items listed below require periodic check and maintenance to retain the performance of this machine and ensure safe operation. When handling the controller, the player will be in direct contact with it. In order to always allow the player to enjoy the game, be sure to clean it regularly. Also, it is advisable to provide wet tissue, etc. available for player use.

- Be sure to check once a year to see if Power Cords are damaged, the plug is securely inserted, dust is accumulated between the Socket Outlet and the Power Plug, etc. Using the product with dust as is accumulated can cause a fire or electric shock.
- Periodically once a year, request the place of contact herein stated or the Distributor, etc. where the product was purchased from, as regards the interior cleaning. Using the product with dust as is accumulated in the interior without cleaning can cause a fire or accident. Note that cleaning the interior parts can be performed on a pay-basis.

CLEANING THE FRONT GLASS AND MIRROR

When cleaning, be sure to comply with the following CAUTION and instructions so as to ensure that the front glass and mirror are not damaged.

Use care when handling glass made parts. When the glass is damaged, fragments of glass can cause injury.

- Be sure to use the accessory glass cleaner or high-efficiency alkaline cleansing water. To avoid damaging the glass surfaces, do not use solutions such as thinner and alcohol, or abrasives, nor bleaching agents.
- Use a soft cloth.
- When removing an attached large particle of dust (or foreign matter), do not rub with a cloth.

Remove the front glass when cleaning the front glass and mirror. First, remove GLASS HOLDER UPPER only. Then, put your hand through the square hole in the back side of GLASS HOLDER UPPER, and pull the front glass toward you.
15. TROUBLESHOOTING

Should trouble occur, first check wiring connector connections.

</tbody>
</table>
If the light emission of 2 LED's can not be seen, the fault or malfunctioning may be considered. Replace by using the following procedure. Also, when wiping off the soils, remove the ASSY SENSOR as per the same procedure.

1. Turn power off.
2. Remove the Back Door.
3. Disconnect the ASSY SENSOR CONNECTOR.
4. Pull out the ASSY SENSOR.
5. Disconnect the connector from the both ends of the LED BD which shows defects.
6. Take out the 2 U Nuts to remove and replace the LED BD.
In order to prevent an electric shock accident, be sure to turn power off before performing work by touching the interior parts of the product.

Be careful so as not to damage wirings. Damaged wiring can cause an electric shock or short circuit accident.

Be sure to use fuses meeting specified rating. Using fuses exceeding the specified rating can cause a fire or electric shock.

After eliminating the cause of the fuse blowing, replace the fuse. Depending on the cause of fuse blowing, continued use with the fuse as is blown can cause generation of heat resulting in a fire.

By referring to 12-3, remove the Back Door and replace the AC Unit Fuse.
16. GAME BOARD

- In order to prevent electric shock and short circuit accidents, be sure to turn power off before performing work by touching the interior parts of the product.
- Be careful so as not to damage wirings. Damaged wiring can cause a fire or electric shock and short circuit accidents.
- Do not expose the Game BC, etc. without a justifiable reason. Exposed Game BD, etc. can cause electric shock accidents and malfunctioning.

- The electronic parts on the IC Board could be damaged due to human body's static electricity. Before performing IC Board related work, be sure to discharge physically accumulated statics by touching grounded metallic surfaces.
- When asking for the replacement or repair of the product's Game Board (MODEL 3 BOARD), be sure to put the Game Board together with the Shield Case in a Carton Box. Otherwise, the request is not acceptable.

16-1 REMOVING THE BOARD

To replace the IC BD (such as GAME BD, I/O BD, etc.), take out the IC BD by using the following procedure:

1. Turn the MAIN SW off.
2. Take off the screw to unlock and open FRONT DOOR LEFT. Depending on cabinets, the front door may not have this screw.
3. The shield case is contained inside FRONT DOOR LEFT.
4. Disconnect all the Connectors which connect the Base and the Cabinet.
5. The shield case is secured to the base (wooden). Take off the wing bolt which secures the base to the cabinet and take out the shield case together with the base.
6. Take off the 3 screws to remove the case lid. The game BD is contained in the shield case.

19. WIRE COLOR CODE TABLE

THE WIRE COLOR CODE is as follow:

A  PINK
B  SKY BLUE
C  BROWN
D  PURPLE
E  LIGHT GREEN

Wires other than those of any of the above 5 single colors will be displayed by 2 alphanumeric characters.

1  RED
2  BLUE
3  YELLOW
4  GREEN
5  WHITE
7  ORANGE
8  BLACK
9  GRAY

If the right-hand side numeral of the code is 0, then the wire will be of a single color shown by the left-hand side numeral (see the above).

Note 1: If the right-hand side alphanumeric is not 0, that particular wire has a spiral color code. The left-hand side character shows the base color and the right-hand side one, the spiral color.

<Example>  51  .........  WHITE / RED

Note 2: The character following the wire color code indicates the size of the wire.

K:   AWG18, UL1015
L:   AWG20, UL1007
None: AWG22, UL1007
