

Cable Pinout Instructions for the 999-0836 Universal Gun Kit Type II (I/R Games)

Do not Install your new gun or cable without reading this first !!!

1. Open package and view the harness attached to the 999-0836 Universal Gun Kit.
2. Observe the number of wires and the color of each wire. Sega currently uses 4ea types of harnesses. (See Table 1 below. They show what pin each wire is to connect to.)
3. Attach the wires to either the Red or Blue Connector received in your kit. Use the color connector that matches your original gun that is being replaced. (See Fig 1)

Table 1
