

**Important Note to Operators**

If the operators manual was not included in this game when you unpacked it, contact your distributor to get a free copy. (All Atari manuals for coin operated games also include complete illustrated parts lists).

**Self-Test Displays**

Turn *on* the self-test switch on the utility panel inside the coin door to obtain Screen 1 (Operator Information Display). Screen 1 shows the condition of the gamma microprocessor RAM and ROM and its location. Press the auxiliary coin switch to end each display and obtain the next display.

**NOTE**

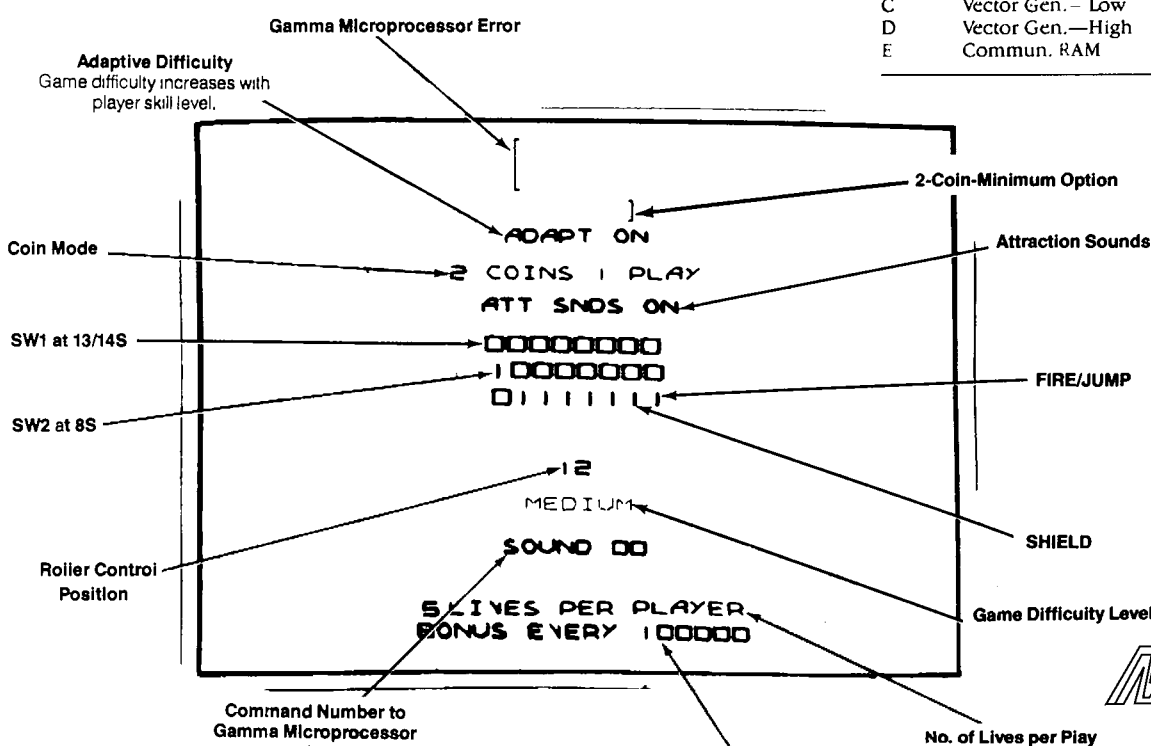

If a locked condition (blank screen) occurs, turn the self-test switch *off* and *on* again. If the game does not restart, troubleshoot the game reset circuitry.

**Gamma Processor Faulty Component Locations (see Screen 1: Operator Information Display).**

| Identifier | Meaning         | Location |
|------------|-----------------|----------|
| R          | Gamma RAM Error | 9P/Q     |
| O          | Gamma ROM Error | 9S       |
| P          | Custom IC Error | 13Q      |
| E          | EEROM Error     | 9Q/R     |

**Alpha Processor Faulty Component Locations (see Screen 2: Alpha Processor Display)**

| Identifier | Hex Location               | Definition | PCB Location |
|------------|----------------------------|------------|--------------|
| A          | 0000-07FF                  | RAM Error  | 1J/K         |
| B          | 0800-08FF & Swap 0200-0700 | RAM        | 1H/J         |
| C          | Vector Gen.—Low            | RAM Error  | 6M/N         |
| D          | Vector Gen.—High           | RAM Error  | 6L/M         |
| E          | Commun. RAM                | Error      | 1F           |

*MAJOR HAVOC*

A Warner Communications Company

Press SHIELD button to advance through sounds or functions.

Press FIRE/JUMP button to activate the sound or function.

**Reset High Scores**  
Activating this function replaces the game High-Score Table with the default set of high scores. To see the High-Score Table, enter the Attract Mode and spin the Roller Control to the left. Spin the Roller Control to the right to re-enter the Attract Mode.

To reset high scores to default settings, hold down the right coin switch. Then, depress and release FIRE/JUMP button. You will hear a loud hissing sound. Wait for this sound to finish before exiting self test. Wait 10 seconds before turning the game off or leaving the Self-Test Mode.

2-Coin Minimum\*

\* This game has the ability to select the 2-coin-minimum capability which requires the player to pay for two games in advance.

If you want this capability, short pin 6 on 13N to ground soldering a short piece of wire from ground to this point.
