Replace #161 lamps with the following:
12VDC wedge base 90° view LEDs from SuperBrightLeds.com
WLED-A-90: Amber (preferred for Gorf)
WLED-W-90: Cool White

Display Board Parts:
9x transistor TIP110
9x capacitor 100 nF
6x Lamp #161

This wiring adapter forces all display board lamps to turn on all at once.
This is useful for lamp testing and comparison of different lamps.
